National Income. The Bureau of Economic Analysis of the Department of Commerce prepares detailed estimates on the national income and product. In Oct. 1999 the Bureau revised these accounts back to 1959, and in April 2000 back to 1929. The principal tables are published monthly in *Survey of Current Business*; the complete set of national income and product tables are published in the *Survey* normally each Aug., showing data for recent years. *The National Income and Product Accounts of the United States* (1929–97, 2 vols.) were to be published in early 2001. The conceptual framework and statistical methods underlying the accounts are described in National Income and Product Account (NIPA) Methodology Papers 1–6. Subsequent limited changes are described in the Aug. 1999, Sept. 1999, Oct. 1999, Dec. 1999, April 2000 and Aug. 2000 *Surveys*.

¹In 1996 the chain-weighted method of estimating GDP replaced that of constant base-year prices. In chain-weighting the weights used to value different sectors of the economy are continually updated to reflect changes in relative prices.

Per capita income in 1998 was \$26,482, up from \$18,667 in 1990.

Currency. The unit of currency is the *dollar* (USD) of 100 *cents*. Notes are issued by the 12 Federal Reserve Banks, which are denoted by a branch letter (A = Boston, MA; B = New York, NY; C = Philadelphia, PA; D = Cleveland, OH; E = Richmond, VA; F = Atlanta, GA; G = Chicago, IL; H = St Louis, MO; I = Minneapolis, MN; J = Kansas City, MO; K = Dallas, TX; L = San Francisco, CA).

Inflation was 3.7% in March 2000, up from 1.7% in March 1999. Foreign exchange reserves in Feb. 1998 were US\$31,230m. Gold reserves in Jan. 2000 were 261.7m. troy oz. The USA has the most gold reserves of any country, and more than the combined reserves of the next two (Germany and France). Total money supply in Dec. 1997 was \$1,281bn.

Banking and Finance. The Federal Reserve System, established under The Federal Reserve Act of 1913, comprises the Board of 7 Governors, the 12 regional Federal Reserve Banks with their 25 branches, and the Federal Open Market Committee. The 7 members of the Board of Governors are appointed by the President with the consent of the Senate. Each Governor is appointed to a full term of 14 years or an unexpired portion of a term, one term expiring every 2 years. The Board exercises broad supervisory authority over the operations of the 12 Federal Reserve Banks, including approval of their budgets and of the appointments of their presidents and first vice presidents; it designates 3 of the 9 directors of each Reserve Bank including the Chairman and Deputy Chairman. The Chairman of the Federal Reserve Board is appointed by the President for 4-year terms. The *Chairman* for 2000–04 is Alan Greenspan. The Board has supervisory and regulatory responsibilities over banks that are members of the Federal Reserve System, bank holding companies, bank mergers, Edge Act and agreement corporations, foreign activities of member banks, international banking facilities in the USA, and activities of the US branches and agencies of foreign banks. Legislation of 1991 requires foreign banks to prove that they are subject to comprehensive consolidated supervision by a regulator at home, and have the Board's approval to establish branches, agencies and representative offices. The Board also assures the smooth functioning and continued development of the nation's vast payments system. Another area of the Board's responsibilities involves the implementation by regulation of major federal laws governing consumer credit.

The 12 members of the Federal Open Market Committee (FOMC) include the 7 members of the Board of Governors and 5 of the 12 Federal Reserve Bank presidents. The latter serve 1-year terms on the FOMC in rotation except for the President of the Federal Reserve Bank of New York, who is a permanent member. The FOMC has an essential role in the formulation of monetary policy. It influences credit market conditions, money and bank credit, by buying or selling US government securities; and it also oversees system operations in foreign currencies for the purpose of helping to safeguard the value of the dollar

in international exchange markets and facilitating co-operation and efficiency in the international monetary system. The Board of Governors also influences credit conditions through powers to set reserve requirements, to approve discount rates at Federal Reserve Banks, and to fix margin requirements on stock-market credit.

The Reserve Banks advance funds to depository institutions, issue Federal Reserve notes (the only form of currency apart from coins), act as fiscal agent for the government, and afford nationwide cheque-clearing and fund transfer arrangements. They may increase or reduce the country's supply of reserve funds by buying or selling government securities and other obligations at the direction of the FOMC. The purchase and sale of securities in the open market is conducted by the Federal Reserve Bank of New York. Their capital stock is held by the member banks, but it carries no voting rights except in the election of directors.

From 1968 the Congress passed a number of consumer financial protection acts, the first of which was the Truth in Lending Act, for which it has directed the Board to write implementing regulations and assume partial enforcement responsibility. Others include the Equal Credit Opportunity Act, Home Mortgage Disclosure Act, Consumer Leasing Act, Fair Credit Billing Act, Truth in Savings Act and Electronic Fund Transfer Act. To manage these responsibilities the Board has established a Division of Consumer and Community Affairs. To assist it, the Board consults with a Consumer Advisory Council, established by the Congress in 1976 as a statutory part of the Federal Reserve System.

Another statutory body, the Federal Advisory Council, consists of 12 members (one from each district); it meets in Washington four times a year to advise the Board of Governors on economic and banking developments. Following the passage of the Monetary Control Act of 1980, the Board of Governors established the Thrift Institutions Advisory Council to provide information and views on the special needs and problems of thrift institutions. The group is comprised of representatives of mutual savings banks, savings and loan associations, and credit unions.

All depository institutions (commercial and savings banks, savings and loan associations, credit unions, US agencies and branches of foreign banks, and Edge Act and agreement corporations) must meet reserve requirements set by the Federal Reserve and hold the reserves in the form of vault cash or deposits at Federal Reserve Banks.

Banks which participate in the federal deposit insurance fund have their deposits insured against loss up to \$100,000 for each account. The fund is administered by the Federal Deposit Insurance Corporation established in 1933; it obtains resources through annual assessments on participating banks. All members of the Federal Reserve System are required to insure their deposits through the Corporation, and non-member banks may apply and qualify for insurance.

The Federal Deposit Insurance Corporation Improvement Act of 1992 originated with bank reform initiatives. It imposed new capital rules on banks, new reporting requirements and a code of 'safety and soundness' standards. The main aim of the Act is to reduce risk through rigorous enforcement of capital requirements. Regulators are required to take action where banks fail to observe these standards.

In 1999 the 2 largest banks in the world in terms of market capitalization were both US banks. Citigroup was the largest (\$161bn. in Oct. 1999), followed by Bank of America (\$101bn. in Oct. 1999). The next largest US banks by market capitalization are Wells Fargo, Chase Manhattan and Bank One.

The key stock exchanges are the New York Stock Exchange (NYSE), the Nasdaq Stock Exchange (NASDAQ) and the American Stock Exchange (ASE). There are several other stock exchanges, in Philadelphia, Boston, San Francisco (Pacific Stock Exchange) and Chicago, although trading is very limited in them.

In 1999 the USA received \$276bn. worth of foreign direct investment—3 times as much as any other country.

By Oct. 2000 approximately 18% of the population were using e-banking.

Weights and Measures. The US Customary System derives from the British Imperial System. It differs in respect of the *gallon* (= 0.83268 Imperial gallon); *bushel* (= 0.969 Imperial bushel); *hundredweight* (= 100 lb); and the *short or net ton* (= 2,000 lb).

ENERGY AND NATURAL RESOURCES

Electricity. Net capacity in 1999 was 639.3m. kW. Fossil fuel accounts for approximately 70% of electricity generation. In 1999, 19.8% of electricity was produced by 104 nuclear reactors. (The last one to begin commercial operation was in 1996.) In 1999 the USA had a nuclear generating capacity of 97,200 MW. Electricity production in 1999 was the highest in the world, at 3,173,674m. kWh.¹ Consumption per capita in 1997 was 11,728 kWh.

¹Does not include non-utility production.

Oil and Gas. Crude oil production (1999), 2,956m. bbls. (8.1m. bbls. a day). Production has been gradually declining since the mid-1980s, when annual production was 3,274m. bbls. Only Saudi Arabia produces more oil. Proven reserves were 28,600m. bbls. in 1999. Output (1999, preliminary) was valued at \$33.65bn.

The USA is by far the largest single consumer of natural gas, and the second largest producer after Russia. Natural gas production, 1999, was 18.76trn. cu. ft. As of 1 Jan. 2000 the USA had proven gas reserves of 164trn. cu. ft.

Wind. The USA is the second largest producer of wind-power, after Germany. By the end of 1999 total installed capacity amounted to 2,502 MW.

Water. The total area covered by water is approximately 181,518 sq. miles: comprising 78,937 sq. miles inland; 42,528 sq. miles coastal; 60,052 great lakes. Americans' average annual water usage is nearly 67,000 cu. ft per person—more than twice the average for an industrialized nation.

Non-Fuel Minerals. The USA is wholly dependent upon imports for columbium, bauxite, mica sheet, manganese, strontium and graphite, and imports over 80% of its requirements of industrial diamonds, fluorspar, platinum, tantalum, tungsten, chromium and tin.

Total value of non-fuel minerals produced in 1998 was \$39,600m. (\$33,445m. in 1990). Details of some of the main minerals produced are given in the following tables.

Coal. Demonstrated coal reserves were 507,740m. short tons at 1 Jan. 1997. Output in 1998 (in 1,000 short tons): 1,117,535 including bituminous coal, 640,370; sub-bituminous coal, 386,147; lignite, 85,767; anthracite, 5,252. Output from opencast workings, 699,807; underground mines, 417,728. Value of total output, 1998, \$19.75bn.

Agriculture. Agriculture in the USA is characterized by its ability to adapt to widely varying conditions, and still produce an abundance and variety of agricultural products. From colonial times to about 1920 the major increases in farm production were brought about by adding to the number of farms and the amount of land under cultivation. During this period nearly 320m. acres of virgin forest were converted to crop land or pasture, and extensive areas of grasslands were ploughed. Improvident use of soil and water resources was evident in many areas.

During the next 20 years the number of farms reached a plateau of about 6.5m., and the acreage planted to crops held relatively stable around 330m. acres. The major source of increase in farm output arose from the substitution of power-driven machines for horses and mules. Greater emphasis was placed on development and improvement of land, and the need for conservation of basic agricultural resources was recognized. A successful conservation programme, highly co-ordinated and on a national scale—to prevent further erosion, to restore the native fertility of damaged land and to adjust land uses to production capabilities and needs—has been in operation since early in the 1930s.

Since the Second World War the uptrend in farm output has been greatly accelerated by increased production per acre and per farm animal. These increases are associated with a higher degree of mechanization; greater use of lime and fertilizer; improved varieties, including hybrid maize and grain sorghums; more effective control of insects and disease; improved strains of livestock and poultry; and wider use of good husbandry practices, such as nutritionally balanced feeds, use of superior sites and better housing. During this period land included in farms decreased slowly, crop land harvested declined somewhat more rapidly, but the number of farms declined sharply.

All land in farms totalled less than 500m. acres in 1870, rose to a peak of over 1,200m. acres in the 1950s and declined to 947m. acres in 1999, even with the addition of the new States of Alaska and Hawaii in 1960. The number of farms declined from 6.35m. in 1940 to 2.19m. in 1999, as the average size of farms doubled. The average size of farms in 1999 was 432 acres, but ranged from a few acres to many thousand acres. In 1997 the total value of land and buildings was \$912,344m. The average value of land and buildings per acre in 1998 was \$1,000.

At the 1990 census 66,964,000 persons (22.5% of the population) were rural, of whom 4,591,000 (under 2%) lived on farms. In 1997 there were an estimated 1,317,000 farm operators and managers and 2,030,000 persons in other agricultural and related occupations, of which 796,000 were farm workers. There were in 1997 4.8m. tractors and 662,000 harvester-threshers.

Forestry. Forests covered a total area of 525m. acres (212m. ha) in 1995, or 23% of the land area. The gross area of national forest was 231.7 acres in 1998, of which 191.9m. acres were federally owned ('National Forest system'). Between 1990 and 1995 new planting resulted in the total area under forests growing by 7.2m. acres (2.9m. ha), the largest increase in any country in the world over the same period. In 1996 there were 518m. acres of timberland (124m. acres federally owned or managed, 35m. acres state, county or municipality owned, 357m. acres private). Timber production was 490.62m. cu. metres in 1998. The USA is the world's largest producer of roundwood (15% of the world total in 1998). It is also the highest consumer of roundwood. Timber consumption in 1998 totalled 17.04bn. cu. ft, including 3.6bn. cu. ft of imports.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). More than half of the areas are in Alaska (56%), followed by California (13%), Arizona, Washington and Idaho.

Environment. The USA's carbon dioxide emissions in 1996 accounted for 22.2% of the world total, higher than any other country, and according to the *World Bank Atlas* were equivalent to 20.0 tonnes per capita.

Fisheries. In 1998 the domestic catch was 9,194m. lb, valued at \$3,128m. (including 1,306m. lb of shellfish valued at \$1,681.5m.). Main species landed in terms of value (\$1m.): shrimp, 515.6; crab, 473.4; salmon, 257.5; American lobster, 253.6; Alaska pollock, 190.1. Disposition of the domestic catch (1m. lb): fresh or frozen, 6,870; tinned, 516; cured, 129; reduced to meal or oil, 1,679. The USA's imports of fishery commodities in 1998 (\$8.58bn.) were exceeded only by those of Japan.

In the period 1995–97 the average American citizen consumed 46.1 lb (20.9 kg) of fish and fishery products a year, compared to an average 34.6 lb (15.7 kg) for the world as a whole. In 1996 per capita consumption of fish and shellfish was 14.7 lb (6.7 kg).

Tennessee Valley Authority. Established by Act of Congress, 1933, the TVA is a multiple-purpose federal agency which carries out its duties in an area embracing some 41,000 sq. miles in the 7 Tennessee River Valley states: Tennessee, Kentucky, Mississippi, Alabama, North Carolina, Georgia and Virginia. In addition, 76

counties outside the Valley are served by TVA power distributors. Its 3 directors are appointed by the President, with the consent of the Senate; headquarters are in Knoxville (TN). Under a policy announced in Dec. 1994 the TVA is subject to a debt ceiling of \$30,000m. Total debt in 1994 was \$26,000m.

The primary task of the TVA was the multipurpose development of the Tennessee River for flood control, navigation, and electric power production. In 1994 three nuclear reactors were in operation.

The TVA has also contributed to controlling erosion on the land, introducing better fertilizers and new farming practices, eradicating malaria, demonstrating ways electricity could lighten the burdens in the home and increase production on the farm, and the creation of potential job-producing enterprises.

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in the USA—and the world—in April 2000 were General Electric (market capitalization of US\$534,046.4m.), Cisco Systems (market capitalization of US\$434,066.8m.), Intel (market capitalization of US\$388,089.4m.) and Microsoft (market capitalization of US\$346,773.1m.). According to a survey published by the New York-based Interbrand in July 2000, Coca-Cola is the most valuable brand, worth US\$72.5bn.

The following table presents industry statistics of manufactures as reported at various censuses from 1909 to 1987 and from the Annual Survey of Manufactures for years in which no census was taken.

The annual Surveys of Manufactures carry forward the key measures of manufacturing activity which are covered in detail by the Census of Manufactures. The large plants in the surveys account for approximately two-thirds of the total employment in operating manufacturing establishments in the USA.

The number of employees in the manufacturing industry in 2000 was approximately 18,437,000. In 2000 manufacturing contributed 17% of GDP and provided 14% of jobs, down from 27% of GDP and 31% of jobs in 1960. Industrial production grew far faster during the 1990s than in any other major economy, output expanding by 34% during the period 1990–98. Employees worked an average of 41.5 hours per week in 2000 for an average weekly income of \$597.

The leading industries in 1996 in terms of value added by manufacture (in \$1m.) were: motor vehicles and equipment, 105,899; electronic components and accessories, 84,059; pharmaceuticals, 59,813; miscellaneous plastics products, 55,621. In 1998 a total of 11,82,000 motor vehicles were made in the USA, making it the world's leading vehicle producer.

In 1997 principal commodities produced (by value of shipments, in \$1m.) included: transportation equipment, 515,882; food and allied products, 480,840; industrial machinery and equipment, 407,393; chemicals and allied products, 400,085; electronic and other electrical equipment, 348,560.

UNITED STATES OF AMERICA

The USA is the world's largest beer producer, with 6,168m. gallons in 1995-96. Net profits (1999) for manufacturing corporations reached a record \$356bn. before tax (\$261bn. after tax).

1998	53.2	108.8	49.1	59.7

¹The sum of these 2 items should equal the total in the preceding column; any difference is due to rounding.

In 1997 companies comprising 65% of raw steel production employed 83,466 wage-earners who worked an average of 42.7 hours per week and earned an average of \$23.90 per hour: total employment costs were \$6,465m. and total employment costs for 28,359 salaried employees were \$2,378m.

Labour. The Bureau of Labor Statistics estimated that in 2000 the civilian labour force was 140,863,000 (67.2% of those 16 years and over), of whom 135,208,000 were employed and 5,655,000 (4.0%) were unemployed. By Sept. 2000 the unemployment rate was down to 3.9%—the lowest rate since 1970. Approximately 23m. new jobs were created during the 1990s. By early 2001 an average of 150,000 new jobs were being created every month. Employment by industry in 2000:

A total of 17 strikes and lockouts of 1,000 workers or more occurred in 1999, involving 73,000 workers and 2.0m. idle days; the number of idle days was 0.01% of the year's total working time of all workers. Between 1989 and 1998 strikes cost the USA an average of 54 days per 1,000 employees a year.

The Federal Mediation and Conciliation Service, the National Labor Relations Board, the National Mediation Board and the National Railroad Adjustment Board provide formal machinery for the settlement of labour disputes.

On 1 Sept. 1997 the federal hourly minimum wage was raised from \$4.75 to \$5.15 an hour. On 1 Oct. 1996 it had been raised from \$4.25 to \$4.75 an hour, the first time it had been raised since 1991.

Labour relations are legally regulated by the National Labor Relations Act, amended by the Labor-Management Relations (Taft-Hartley) Act, 1947 as amended by the Labor-Management Reporting and Disclosure Act, 1959, again amended in 1974, and the Railway Labor Act of 1926, as amended in 1934 and 1936.

A survey for the World Economic Forum's 1999 *Global Competitiveness Report* showed that the USA was the easiest country in the world in which to set up a business.

Trade Unions. The labour movement comprises 78 national and international labour organizations plus a large number of small independent local or single-firm labour organizations. The American Federation of Labor and the Congress of Industrial Organizations merged into one organization, the AFL-CIO, in 1955, with 13m. members in 2000. Its president is John Sweeney, elected 1995. There were 16,476,700 union members in total in 1999.

Unaffiliated or independent labour organizations, inter-state in scope, had an estimated total membership excluding all foreign members (1993) of about 3m.

Labour organizations represented 14.9% (17.9m.) of wage and salary workers in 2000; a newly developing 'associative unionism' is not based on the workplace, but provides representation for employees which is portable throughout their work history; 13.5% (16.3m.) were actual members of unions. 38% of employees in the public sector, and 9% in the private sector, were members of unions in 2000. Strongholds of organized labour are, industry-wise, iron and steel, railways, coal mining and car building; region-wise, East coast cities and the mid-West industrial belt.

INTERNATIONAL TRADE

The North American Free Trade Agreement (NAFTA) between the USA, Canada and Mexico was signed on 7 Oct. 1992 and came into effect on 1 Jan. 1994. The UK has had 'most-favoured-nation' status since 1815. In 1998 foreign direct investment totalled \$811,756m., the leading investor still being the United Kingdom.

1997	689.2	870.7
1998	682.1	911.9
1999	695.0	1,025.0

The USA is both the world's leading importer and the leading exporter. In 1998 its trade accounted for 17.0% of the world's exports and 22.5% of imports.

COMMUNICATIONS

Roads. On 31 Dec. 1997 the total public road mileage was 3,944,597 miles (urban, 836,109; rural, 3,108,488). Of the urban roads, 113,000 were state controlled and 589,000 under local control. 677,000 miles of rural roads were controlled by the states, about 2,140,000 miles of rural roads were under local control, and, in 1996, there were about 169,000 miles of federal park and forest roads. State highway funds were \$73,994m. in 1997.

Motor vehicles registered in 1998: 211,617,000, including 131,839,000 automobiles, 716,000 buses, 79,062,000 trucks and 3,839,000 motorcycles and mopeds. There were 184,980,000 licensed drivers in 1998. The average distance travelled by a passenger car in the year 1997 was 11,580 miles. There were 41,471 deaths in road accidents in 1998.

Rail. Freight service is provided by 12 major independent railroad companies and several hundred smaller operators. Long-distance passenger trains are run by the National Railroad Passenger Corporation (Amtrak), which is federally assisted. Amtrak was set up in 1971 to maintain a basic network of long-distance passenger trains, and is responsible for almost all non-commuter services over some 38,000 route-km, of which it owns only 1,256 km (555 km electrified). Outside the major conurbations, there are almost no regular passenger services other than those of Amtrak, which carried 21,248,000 passengers in 1998. Passenger revenue for Amtrak (1998) was \$821.5m.; revenue passenger miles, 5,325m.

Civil Aviation. The busiest airport in 1999 was Atlanta (Hartsfield International), which handled 38,136,866 passenger enplanements (35,499,605 on domestic flights). The second busiest was Chicago (O'Hare) with 34,050,083 passenger enplanements (30,073,267 on domestic flights), followed by Los Angeles International, with 30,830,915 passenger enplanements (23,603,190 on domestic flights). As well as being the 3 busiest airports in the USA for passenger traffic in 1999, they are also the 3 busiest in the world. New York (John F. Kennedy) was the busiest airport in the USA for international passenger enplanements in 1999, with 8,374,940, ahead of Miami International, with 7,264,863. The leading domestic routes for 1999 were New York to/from Los Angeles (3,280,000 passengers), New York to/from Chicago (2,982,000) and New York to/from Boston (2,821,000).

The leading airports in 1999 on the basis of aircraft departures completed were Atlanta, Hartsfield International (413,595); Chicago, O'Hare (387,146); Dallas/Fort Worth (387,202).

There were 40 airports with more than 100,000 international enplanements in 1999. These were, in descending order: New York (John F. Kennedy), Miami, Los Angeles, Chicago (O'Hare), New York (Newark), San Francisco, Honolulu, Atlanta (Hartsfield), Houston (George Bush), Dallas/Fort Worth, Boston, Washington, D.C. (Dulles International), Guam, Detroit (Metropolitan-Wayne County), Orlando (Orlando International), San Juan (Luis Muñoz Marin International), Philadelphia, Seattle-Tacoma, Minneapolis/St Paul, Anchorage, New York (La Guardia), Saipan, Fort Lauderdale (Hollywood), Orlando (Sanford), Cincinnati (Northern Kentucky), Las Vegas (McCarran), Denver, Phoenix (Sky Harbor), Charlotte, Baltimore (Baltimore/Washington), Portland, Pittsburgh, Tampa, San Jose, St Louis International (Lambert), San Diego, Bangor, St Petersburg/Clearwater, Washington, D.C. (Ronald Reagan Washington National) and Memphis.

In 1999 Delta Air Lines carried the most passengers of any airline in the world with 101,873,629 (around 8% on international flights), ahead of United Airlines, with 80,435,380 (around 14% on international flights) and American Airlines, with 72,623,460 (around 21% on international flights). American Airlines carried the most international passengers of any US carrier, ahead of United Airlines. American Airlines also flew the furthest of any carrier in the world in 1997, covering 931.4m. miles, ahead of United Airlines, with 867.7m. miles.

US flag carriers in scheduled service enplaned 683.2m. revenue passengers in 1999, with 491,900m. revenue passenger miles.

Shipping. In Oct. 1998 US merchant ocean-going vessels were employed as follows: active, 265 of 12.1m. DWT, of which 81 of 3.1m. DWT were foreign trade, 124 of 6.8m. DWT in domestic trade and 14 of 1.1m. DWT were in foreign to foreign operations. Inactive vessels totalled 4.8m. DWT; 28 of 1.3m. DWT privately owned were laid up and 180 of 3.4m. DWT were government-owned National Defense reserve fleet. Of the total vessels in the US fleet, 283—of 13.3m. DWT—out of a total of 473 ships of 1,000 gross tons and over were privately owned. The 473 ships included 156 tankers and 91 container ships. In 1996 vessels totalling 371,107,000 NRT entered, and 305,250,000 NRT cleared, all US ports.

On 1 July 1999 the US merchant marine included 474 ocean-going self-propelled merchant vessels of 1,000 gross tons or over, with an aggregate 16.9m. DWT. This included 158 tankers of 9.5m. DWT.

Telecommunications. Regional private companies formed from the American Telephone and Telegraph Co. after its dissolution in 1995 ('Baby Bells') operate the telephone, telegraph, telex and electronic transmission services system at the national and local levels. In 1998 main telephone lines numbered 179,882,100 (or 661 per 1,000 persons); there were 86,047,000 mobile phone subscribers in 1999. This figure was expected to exceed 100m. by the end of 2000. There were 141m. PCs in 1999 (510 for every 1,000 persons) and in 1995 there were 21m. fax machines. The number of Internet users in Nov. 2000 was estimated to be 153.84m., or 55.8% of the population (the second highest percentage in the world after Sweden). Internet commerce in the USA far outstrips that in all of the rest of the world. In 1998 e-commerce in the USA already totalled some US\$25.8bn.; it has been forecast to expand at such a rate that in 2001 it will be worth US\$158bn.

Legislation on the media and telecommunications of 1996 coming into force on 31 March 1999 aimed at deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Postal Services. The US Postal Service superseded the Post Office Department on 1 July 1971.

Postal business for the years ended in Sept. included the following items:

	1996	1997	1998	1999
Number of post offices	38,212	38,019	38,159	38,174
Operating revenue (\$1,000)	56,402,000	58,132,600	60,005,000	64,703,000
Expenditures (\$1,000)	53,112,500	60,192,256	57,778,000	64,340,000

SOCIAL INSTITUTIONS

Justice. Legal controversies may be decided in two systems of courts: the federal courts, with jurisdiction confined to certain matters enumerated in Article III of the Constitution, and the state courts, with jurisdiction in all other proceedings. The federal courts have jurisdiction exclusive of the state courts in criminal prosecutions for the violation of federal statutes, in civil cases involving the government, in bankruptcy cases and in admiralty proceedings, and have jurisdiction concurrent with the state courts over suits between parties from different states, and certain suits involving questions of federal law.

The highest court is the Supreme Court of the US, which reviews cases from the lower federal courts and certain cases originating in state courts involving questions of federal law. It is the final arbiter of all questions involving federal statutes and the Constitution; and it has the power to invalidate any federal or state law or executive action which it finds repugnant to the Constitution. This court, consisting of 9 justices appointed by the President who receive salaries of \$173,600 a year (the Chief Justice, \$181,400), meets from Oct. until June every year. For the term ended June 2000 it disposed of 8,445 cases, deciding 81 on their merits. In the remainder of cases it either summarily affirms lower court decisions or declines to review. A few suits, usually brought by state governments, originate in the Supreme Court, but issues of fact are mostly referred to a master.

The US courts of appeals number 13 (in 11 circuits composed of 3 or more states and 1 circuit for the District of Columbia and 1 Court of Appeals for the Federal Circuit); the 179 circuit judges receive salaries of \$141,700 a year. Any party to a suit in a lower federal court usually has a right of appeal to one of these courts. In addition, there are direct appeals to these courts from many federal administrative agencies. In the year ending 30 June 1997, 53,742 appeals were filed in the courts of appeals, including 1,417 in the Federal Circuit.

The trial courts in the federal system are the US district courts, of which there are 89 in the 50 states, 1 in the District of Columbia and 1 each in the Commonwealth of Puerto Rico and the Territories of the Virgin Islands, Guam and the Northern Marianas. Each state has at least 1 US district court, and 3 states have 4 apiece. Each district court has from 1 to 28 judgeships. There are 649 US district judges (\$133,600 a year), who received 261,162 civil cases from 1 July 1997 to 30 June 1998.

In addition to these courts of general jurisdiction, there are special federal courts of limited jurisdiction. The US Court of Federal Claims (16 judges at \$133,600 a year) decides claims for money damages against the federal government in a wide variety of matters; the Court of International Trade (9 judges at \$133,600) determines controversies concerning the classification and valuation of imported merchandise.

The judges of all these courts are appointed by the President with the approval of the Senate; to assure their independence, they hold office during good behaviour and cannot have their salaries reduced. This does not apply to judges in the Territories, who hold their offices for a term of 10 years or to judges of the US Court of Federal Claims. The judges may retire with full pay at the age of 70 years if they have served a period of 10 years, or at 65 if they have 15 years of service, but they are subject to call for such judicial duties as they are willing to undertake. 11 US judges up to 1997 have been involved in impeachment proceedings, of whom 7 were convicted and removed from office.

In 1997-98, of the 261,262 civil cases filed in the district courts, 159,172 arose under various federal statutes (such as labour, social security, tax, patent, securities, antitrust and civil rights laws); 52,218 involved personal injury or property damage claims; 44,205 dealt with contracts; and 5,655 were actions concerning real property.

In 2000 the number of lawyers in the USA passed the 1m. mark, equivalent to 363 per 100,000 people.

Among the 69,052 criminal defendants (48,682 criminal cases) filed in 1997 in the district courts, 25,090 persons were charged with alleged infractions of drug laws; 11,832 persons were charged with miscellaneous general offences; 11,664 with embezzlement and fraud; 4,089 for larceny and theft; 7,016 were charged with immigration violations; 1,763 with robbery; and 1,663 with forgery and counterfeiting and fraud.

Persons convicted of federal crimes may be fined, released on probation under the supervision of the probation officers of the federal courts, confined in prison, or confined in prison with a period of supervised release to follow, also under the supervision of probation officers of the federal courts. Federal prisoners are confined in 87 institutions incorporating various security levels that are operated by the Bureau of Prisons. Prisoners confined in Federal and State Prisons at 1 Dec. 1997 numbered 1,197,590 (74,112 women). In 1996 there were 1.63m. inmates in all prisons and jails (615 inmates per 100,000 population). By 1998 the figure had risen to 1.74m. (645 per 100,000).

The state courts have jurisdiction over all civil and criminal cases arising under state laws, but decisions of the state courts of last resort as to the validity of treaties or of laws of the USA, or on other questions arising under the Constitution, are subject to review by the Supreme Court of the US. The state court systems are generally similar to the federal system, to the extent that they generally have a number of trial courts and intermediate appellate courts, and a single court of last resort. The highest court in each state is usually called the Supreme Court or Court of Appeals with a Chief Justice and Associate Justices, usually elected but sometimes appointed by the Governor with the advice and consent of the State Senate or other advisory body; they usually hold office for a term of years, but in some instances for life or during good behaviour. The lowest tribunals are usually

those of Justices of the Peace; many towns and cities have municipal and police courts, with power to commit for trial in criminal matters and to determine misdemeanours for violation of the municipal ordinances; they frequently try civil cases involving limited amounts of damages.

There were no executions from 1968 to 1976. The US Supreme Court had held the death penalty, as applied in general criminal statutes, to contravene the eighth and fourteenth amendments of the US constitution, as a cruel and unusual punishment when used so irregularly and rarely as to destroy its deterrent value. The death penalty was reinstated by the Supreme Court in 1976, but has not been authorized in Alaska, the District of Columbia, Hawaii, Iowa, Kansas, Maine, Massachusetts, Michigan, Minnesota, North Dakota, Rhode Island, Vermont, West Virginia and Wisconsin. There were, in 1997, 3,335 (1,459 non-white) prisoners under sentence of death. In 2000 there were 85 executions (98 in 1999 and 14 in 1991). From 1976–2000 there were 683 executions of which 239 were in Texas and 81 in Virginia.

There were 16,914 murders in 1998, 7% lower than in 1997 and 31.5% lower than in 1991. The murder rate in 1998 was 6.3 per 100,000 persons, the lowest rate since 1967. 67.8% of all murders in 1997 were carried out by guns (53.3% of which were handguns).

Education. The adult literacy rate is at least 99%.

Elementary and secondary education is mainly a state responsibility. Each state and the District of Columbia has a system of free public schools, established by law, with courses covering 12 years plus kindergarten. There are 3 structural patterns in common use; the K8-4 plan, meaning kindergarten plus 8 elementary grades followed by 4 high school grades; the K6-3-3 plan, or kindergarten plus 6 elementary grades followed by a 3-year junior high school and a 3-year senior high school; and the K5-3-4 plan, kindergarten plus 5 elementary grades followed by a 3-year middle school and a 4-year high school. All plans lead to high-school graduation, usually at age 17 or 18. Vocational education is an integral part of secondary education. Many states also have 2-year colleges in which education is provided at a nominal cost. Each state has delegated a large degree of control of the educational programme to local school districts (numbering 14,891 in school year 1998-99), each with a board of education (usually 3 to 9 members) selected locally and serving mostly without pay. The school policies of the local school districts must be in accord with the laws and the regulations of their state Departments of Education. While regulations differ from one jurisdiction to another, in general it may be said that school attendance is compulsory from age 7 to 16.

'Charter schools' are legal entities outside the school boards administration. They retain the basics of public school education, but may offer unconventional curricula and hours of attendance. Founders may be parents, teachers, public bodies or commercial firms. Organization and conditions depend upon individual states' legislation. The first charter schools were set up in Minnesota in 1991. By Sept. 1999, 1,484 charter schools were operating in 31 states and Washington, D.C.

In 1940 a new category was established—the 'functionally illiterate', meaning those who had completed fewer than 5 years of elementary schooling; for persons 25 years of age or over this percentage was 1.6 in March 1999 (for the Black population it was 1.9%); it was 0.6% for white and 0.4% for Blacks in the 25-29-year-old group. The Bureau reported that in March 1999, 83.4% of all persons 25 years old and over had completed 4 years of high school or more, and that 25.2% had completed a bachelor's degree or more. In the age group 25 to 29, 87.8% had completed 4 years of high school or more, and 28.2% had completed a bachelor's degree or more.

In the autumn of 1998, 14,549,000 students (8,582,000 full-time and 8,163,000 women) were enrolled in 3,913 colleges and universities; 2,218,000 were first-time students. 36.6% of the population between the ages of 18 and 24 were enrolled in

colleges and universities. It is projected that in 2010 the student population will number 17,490,000.

Public elementary and secondary school revenue is supplied from the county and other local sources (44·8% in 1997–98), state sources (48·4%) and federal sources (6·8%). In 1998–99 expenditure for public elementary and secondary education totalled about \$349,200m., including \$303,500m. for current operating expenses, \$37,700m. for capital outlay and \$8,000m. for interest on school debt. The current expenditure per pupil in average daily attendance was about \$6,900. The total cost per pupil, also including capital outlay and interest, amounted to about \$7,960.

In 1998–99 total expenditure on education came to about 7·1% of GDP. Estimated total expenditures for private elementary and secondary schools in 1998–99 were about \$27,700m. In 1998–99 college and university spending totalled about \$246,300m., of which about \$152,400m. was spent by institutions under public control. The federal government contributed about 12% of total current-fund revenue; state governments, 23%; student tuition and fees, 28%; and all other sources, 37%.

Vocational education below college grade, including the training of teachers to conduct such education, has been federally aided since 1918. Federal support for vocational education in 1998–99 amounted to about \$1,128m. Many public high schools offer vocational courses in addition to their usual academic programmes.

¹Schools with both elementary and secondary grades are counted twice, once with the elementary and once with the secondary schools. ²Data from 1997–98. ³Estimated.

In the autumn of 1998 there were 18·0 pupils per teacher in public elementary schools in the USA and 14·2 pupils per teacher in public secondary schools.

Most of the private elementary and secondary schools are affiliated with religious denominations. In 1998–99 there were 6,990 Roman Catholic elementary schools with 1,876,000 pupils and 105,900 teachers, and 1,227 secondary schools with 620,000 pupils and 47,100 teachers.

During the school year 1998–99 high-school graduates numbered about 2,740,000 (of whom about 2,456,000 were from public schools). Institutions of higher education conferred about 1,184,000 bachelor's degrees during the year 1998–99, 559,000 associate's degrees; 430,000 master's degrees; 46,000 doctorates; and 78,600 first professional degrees. In 1998–99 the US Department of Education provided \$11,685m. in grants, loans, work-study programmes and other financial assistance to post-secondary students. Other agencies of the Federal Government provided about \$2,945m. in additional assistance.

During the academic year 1999–2000, 515,000 foreign students were enrolled in American colleges and universities. The countries with the largest numbers of students in American colleges were: China, 54,500; Japan, 46,900; India, 42,300; South Korea, 41,200; Taiwan, 29,200; Canada, 23,500.

In 1998–99, 130,000 US students were enrolled at colleges and universities abroad. The country attracting the most students from the USA was the United Kingdom, with 27,700.

School enrolment, Oct. 1999, embraced 96·0% of the children who were 5 and 6 years old; 98·7% of the children aged 7–13 years; 98·2% of those aged 14–15, 93·6% of those aged 16–17 and 60·6% of those aged 18–19.

The US National Center for Education Statistics estimates the total enrolment in the autumn of 2000 at all of the country's elementary, secondary and higher

educational institutions (public and private) at 68.1m. (67.6m. in the autumn of 1999).

The number of teachers in regular public and private elementary and secondary schools in the autumn of 2000 was expected to increase slightly to about 3,250,000. The average annual salary of public school teachers was \$40,600 in 1998–99.

A survey for the 1999 *World Competitiveness Yearbook* showed that well-educated people in the USA are the least likely of any country in the world to emigrate.

Health. Admission to the practice of medicine (for both doctors of medicine and doctors of osteopathic medicine) is controlled in each state by examining boards directly representing the profession and acting with authority conferred by state law. Although there are a number of variations, the usual time now required to complete training is 8 years beyond the secondary school with up to 3 or more years of additional graduate training. Certification as a specialist may require between 3 and 5 more years of graduate training plus experience in practice. In Jan. 1999 the estimated number of active physicians (MD and DO—in all forms of practice) in the USA, Puerto Rico and outlying US areas was 756,700 (684,400 in 1994 and 552,700 in 1985).

Dental employment in 1998 numbered 202,000.

Number of hospitals listed by the American Hospital Association in 1998 was 6,021, with 1,013,000 beds (equivalent to 3.7 beds per 1,000 population). Of the total, 275 hospitals with 57,000 beds were operated by the federal government; 1,218 with 139,000 beds by state and local government; 3,026 with 588,000 beds by non-profit organizations (including church groups); 771 with 113,000 beds were investor-owned. The categories of non-federal hospitals were (1997): 5,015 short-term general and special hospitals with 840,000 beds; 125 non-federal long-term general and special hospitals with 18,000 beds; 579 psychiatric hospitals with 95,000 beds; 3 tuberculosis hospitals with fewer than 500 beds.

Patient admissions to community hospitals (1998) was 31,812,000; average daily census was 524,500. There were 474.2m. outpatient visits.

Personal health-care costs projected for 1999 totalled \$998,200m., distributed as follows: hospital care, \$383,200m.; doctors, \$221,400m.; nursing-home care, \$87,300m.; drugs, \$106,100m.; dentists, \$53,700m.; medical durables, \$14,300m.; home health care, \$33,200m.; other personal health care, \$32,400m. Total national health expenditure in 1998 (projected) amounted to \$1,146.8bn. In 1997 the USA spent 14% of its GDP on health—over 3% more than any other leading industrialized nation. Public spending on health amounted to 48% of total health spending in 1997. A survey published by the World Health Organization in June 2000 to measure health systems in all of the sovereign countries and find which country has the best overall health care ranked the USA in 37th place.

In 1998, 22.9% of Americans (25.3% of males and 21.0% of females) were smokers, down from a peak of over 40% in 1964.

Welfare. Social welfare legislation was chiefly the province of the various states until the adoption of the Social Security Act of 14 Aug. 1935. This as amended provides for a federal system of old-age, survivors and disability insurance; health insurance for the aged and disabled; supplemental security income for the aged, blind and disabled; federal state unemployment insurance; and federal grants to states for public assistance (medical assistance for the aged and aid to families with dependent children generally and for maternal and child health and child welfare services).

Legislation of Aug. 1996 began the transfer of aid administration back to the states, restricted the provision of aid to a maximum period of 5 years, and abolished benefits to immigrants (both legal and illegal) for the first 5 years of their residence in the USA. The Social Security Administration (formerly part of the Department of Health and Human Services but an independent agency since March 1995) has responsibility for the programmes—old-age, survivors and disability insurance and supplemental security income. The Administration for Children and Families (ACF), an agency of the Department of Health and Human Services, is responsible for federal programmes which promote the economic and social wellbeing of families, children, individuals and communities. ACF has federal responsibility for the following programmes: the Aid to Families with Dependent Children Program

(providing cash assistance to family and children in the 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands); low income energy assistance; Head Start; child care; child protective services; and a community services block grant. The ACF also has federal responsibility for social service programmes for children, youth, native Americans and persons with developmental disabilities.

The Administration of Ageing (AOA), an agency of the Department of Health and Human Services, serves older persons and their families with social, nutritional, education, and ageing-related research and demonstration projects through the administration of the Older Americans Act. In addition, AOA is the focal point for ageing policy within the Federal government. The Assistant Secretary for Ageing is the primary advocate for the elderly in the USA. In 1995-96, \$830m. was expended through a network of 57 State Units on Ageing, 661 Area Agencies on Ageing, 228 tribal organizations, 6,000 senior centres, and more than 27,000 service providers. More than 250m. meals were also provided through this programme.

The Health Care Financing Administration, an agency of the Health and Human Services Department, has federal responsibility for health insurance for the aged and disabled. Unemployment insurance is the responsibility of the Department of Labor.

In 1996 an average of 4,166,000 families were receiving payments under Aid to Families with Dependent Children (average monthly payment, \$383 per family). Total payments under Aid to Families with Dependent Children were \$20,411m. in 1996. The role of Child Support Enforcement is to ensure that children are supported by their parents. Money collected is for children who live with only one parent because of divorce, separation or out-of-wedlock birth. In 1996 approximately \$12,020m. was collected on behalf of these children.

The Social Security Act provides for protection against the cost of medical care through Medicare, a two-part programme of health insurance for people age 65 and over, people of any age with permanent kidney failure, and for certain disabled people under age 65 who receive Social Security disability benefits. In 1995 payments totalling \$116,400m. were made under the hospital portion of Medicare on behalf of 37m. people. During the same period, \$65,000m. was paid under the voluntary medical insurance portion of Medicare on behalf of 36m. people.

In 1996 about 43.3m. beneficiaries were on the rolls; the average paid to a retired worker (not counting any benefits paid to his/her dependants) in 1998 was \$780 per month. Full retirement benefits are now payable at age 65, with reduced benefits available as early as age 62. Beginning in 2000, the age for full retirement benefits will gradually increase until it reaches 67 in 2027. In 1995 the average actual retirement age for males was 63.

In Dec. 1997, 6.5m. persons were receiving Supplementary Security Income payments, including 1.4m. persons aged 65 or over and over 5m. disabled or blind persons, of whom nearly 1m. were children. Payments, including supplemental amounts from various states, totalled \$29,052m. in 1997.

In 1997 a total of \$367,712m. was spent on cash and non-cash benefits (such as food stamps) for persons with limited incomes: 1,363,000 old-age persons received \$4,532m. in benefits; 81,000 blind people received \$375m.; and 5,052,000 disabled people received \$24,006m. In 1997 the food stamp programme helped 19,744,000 persons at a cost of \$16,822m.; and 26,600,000 persons received help from the national school lunch programme at a cost of \$5,084m.

CULTURE

Broadcasting. The licensing agency for broadcasting stations is the Federal Communications Commission, an independent federal body composed of 5 Commissioners appointed by the President. Its regulatory activities comprise: allocation of spectrum space; consideration of applications to operate individual stations; and regulation of their operations. In 1996 there were 12,313 commercial radio stations, 1,174 commercial TV stations, 352 non-commercial TV stations and 11,119 cable TV systems. Programming is targeted to appeal to a given segment of the population or audience taste. There are 5 national TV networks (3 commercial; colour by NTSC) with 46 national cable networks. All major cities have network affiliates and additional commercial stations.

Legislation on the media and telecommunications of 1996 came into force on 31 March 1999 deregulating the market while preserving safeguards against over-concentration of individual ownership: a single company may not control a network reaching more than 35% of TV viewers, or produce a newspaper and a television service in the same market. Local companies are now permitted to operate long-distance telephone services and also cable TV services.

Broadcasting to countries abroad is conducted by The Voice of America, which functions under a 7-member council nominated by the President and reviewed by Congress. In 1996 Voice of America had 126m. listeners.

In 1997 there were 575m. radio receivers in use, equivalent to 2,116 per 1,000 inhabitants. No other country averaged more than 1,500 radios per 1,000. There were 219m. TV receivers in use in 1997, equivalent to 806 per 1,000 inhabitants (a rate exceeded only in Bermuda). In 1999 there were 66.1m. cable TV subscribers.

Cinema. In Jan. 1994 there were 25,737 screens, including 850 drive-ins; gross box office receipts came to US\$5.25bn. 628 full-length films were made in 1999. An estimated 66% of adults went to the cinema in 1997.

Press. In 1999 there were 1,496 daily newspapers with a combined daily circulation of 56.0m., the second highest in the world behind Japan. There were 736 morning papers and 760 evening papers, plus 905 Sunday papers (circulation, 59.9m.). Unlike Japan, where circulation is rising, in the USA it has fallen since 1980, when daily circulation was 62.2m.

New books and editions published in 1997, 64,711.

Tourism. In 1998 the USA received 46,395,000 visitors, of whom 13,422,000 were from Canada and 9,276,000 from Mexico. 19,110,000 of the total number of visitors in 1996 (46,489,000) were classified as tourists and came mainly from Japan (3.62m.), the UK (2.49m.) and Germany (1.62m.). Nearly 40% of all tourists were from Europe. Only France and Spain received more tourists than the USA in 1998.

In 1997 visitors to the USA spent approximately \$73,268m. (excluding transportation paid to US international carriers). The USA has the highest annual revenue from tourists of any country (more than twice as much as Italy, which received the second most in 1998). Expenditure by US travellers in foreign countries for 1997 was an estimated \$51,220m. (excluding transportation paid to foreign flag international carriers).

Festivals. Among the many famous festivals are the Sundance Film Festival in Jan. and the New York Film Festival in late Sept./early Oct.

Museums and Galleries. Among the most famous museums are the National Gallery in Washington, D.C., the Museum of Fine Arts in Boston, the Metropolitan Museum, the Guggenheim Museum, and the Museum of Modern Art, all in New York, and the Museum of Art in Philadelphia. The most popular art exhibition in 1998 was Monet in the 20th century, at the Museum of Fine Arts in Boston, with 586,000 visitors. Van Gogh's Van Gogh, at the National Gallery in Washington, D.C. had the highest daily attendance in 1998, with an average of 5,339 people per day. In 1997, 35% of US adults visited an art museum at least once.

ALABAMA

KEY HISTORICAL EVENTS

The early European explorers were Spanish, but the first permanent European settlement was French, as part of French Louisiana after 1699. During the 17th and 18th centuries the British, Spanish and French all fought for control of the territory; it passed to Britain in 1763 and thence to the USA in 1783, except for a Spanish enclave on Mobile Bay, which lasted until 1813. Alabama was organized as a Territory in 1817 and was admitted to the Union as a state on 14 Dec. 1819.

The economy was then based on cotton, grown in white-owned plantations by black slave labour imported since 1719. Alabama seceded from the Union at the beginning of the Civil War (1861) and joined the Confederate States of America; its capital Montgomery became the Confederate capital. After the defeat of the Confederacy the state was re-admitted to the Union in 1878. Attempts made during the reconstruction period to find a role for the newly freed black slaves—who made up about 50% of the population—largely failed, and when whites regained political control in the 1870s a strict policy of segregation came into force.

At the same time Birmingham began to develop as an important centre of iron and steel-making. Most of the state was still rural. In 1915 a boll-weevil epidemic attacked the cotton and forced diversification into other farm produce. More industries developed from the power schemes of the Tennessee Valley Authority in the 1930s. The black population remained mainly rural, poor and without political power, until the 1960s when confrontations on the issue of civil rights produced reforms.

TERRITORY AND POPULATION

Alabama is bounded in the north by Tennessee, east by Georgia, south by Florida and the Gulf of Mexico and west by Mississippi. Land area, 50,750 sq. miles (131,443 sq. km). Census population, 1 April 2000, 4,447,100, an increase of 10.1% since 1990. 60.4% of the population was urban in 1990. Of the total population in 1999, 47.9% were male.

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Asiatic</i>	<i>Total</i>	<i>Per sq. mile</i>
1930	1,700,844	944,834	465	105	2,646,248	51.3

ALASKA

KEY HISTORICAL EVENTS

Discovered in 1741 by Vitus Bering, Alaska's first settlement, on Kodiak Island, was in 1784. The area known as Russian America with its capital (1806) at Sitka was ruled by a Russo-American fur company and vaguely claimed as a Russian colony.

Alaska was purchased by the United States from Russia under the treaty of 30 March 1867 for \$7.2m. Settlement was boosted by gold workers in the 1880s. In 1884 Alaska became a 'district' governed by the code of the state of Oregon. By Act of Congress approved 24 Aug. 1912 Alaska became an incorporated Territory; its first legislature in 1913 granted votes to women, 7 years in advance of the Constitutional Amendment.

During the Second World War the Federal government acquired large areas for defence purposes and for the construction of the strategic Alaska Highway. In the 1950s oil was found. Alaska became the 49th state of the Union on 3 Jan. 1959. In the 1970s new oilfields were discovered and the Trans-Alaska pipeline was opened in 1977. The state obtained most of its income from petroleum by 1985.

Questions of land-use predominate; there are large areas with valuable mineral resources, other large areas held for the native peoples and some still held by the Federal government. The population increased by over 400% between 1940 and 1980.

TERRITORY AND POPULATION

Alaska is bounded north by the Beaufort Sea, west and south by the Pacific and east by Canada. The land area is 570,374 sq. miles (1,477,268 sq. km). Census population, 1 April 2000, was 626,932, an increase of 14.0% over 1990. 67.5% of the population was urban in 1990.

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>All Others</i>	<i>Total</i>	<i>Per sq. mile</i>
1950	92,808	...	35,835	128,643	0.23

1990	415,492	22,451	112,100	550,043	1.00

Of the total population in 1990, 52.7% were male, 67.5% were urban and 68.7% were aged 18 years or over. Alaska's Hispanic population was estimated to be 24,795 in 1999, up from 17,803 in 1990.

The largest city is in the borough of Anchorage, which had a 1990 census population of 226,338 and an estimated 1994 population of 254,000. Census populations of the other 13 boroughs, 1990: Aleutians East, 2,464; Bristol Bay, 1,410; Fairbanks North Star, 77,720; Haines, 2,117; Juneau, 26,751; Kenai Peninsula, 40,802; Ketchikan Gateway, 13,828; Kodiak Island, 13,309; Lake and Peninsula, 1,668; Matanuska-Susitna 39,683; North Slope, 5,979; Northwest Arctic, 6,113; Sitka, 8,588. CONSTITUTION AND GOVERNMENT

The state has the right to select 103.55m. acres of vacant and unappropriated public lands in order to establish 'a tax basis'; it can open these lands to prospectors for minerals, and the state is to derive the principal advantage in all gains resulting from the discovery of minerals. In addition, certain federally administered lands reserved for conservation of fisheries and wild life have been transferred to the state. Special provision is made for federal control of land for defence in areas of high strategic importance.

The constitution of Alaska was adopted by public vote, 24 April 1956. The state legislature consists of a Senate of 20 members (elected for 4 years) and a House of Representatives of 40 members (elected for 2 years). The state sends 1 member to the House of Representatives. The franchise may be exercised by all citizens over 18.

The capital is Juneau.

Production: 1997, 473m. bbls. (of US gallons). Proven reserves at 31 Dec. 1997 were 5,161m. bbls. Oil comes mainly from Prudhoe Bay, the Kuparuk River field and several Cook Inlet fields. Revenue to the state from petroleum in 1993 was \$2,684.8m. (87% of general fund revenues). General fund unrestricted revenues, 1993: severance taxes, 33%; oil and gas royalties, 25%; investment earnings, 2%; other oil and gas, 27%; non-petroleum, 13%. In 1996, 9,294bn. cu. ft of natural gas was produced. Natural gas (liquid) production, 1997, 35m. bbls. Proven reserves as at 31 Dec. 1997, 631m. bbls.

Oil from the Prudhoe Bay Arctic field is now carried by the Trans-Alaska pipeline to Prince William Sound on the south coast, where a tanker terminal has been built at Valdez.

Water. The total area covered by water is approximately 44,856 sq. miles.

Agriculture. In some parts of the state the climate during the brief spring and summer (about 100 days in major areas and 152 days in the southeastern coastal area) is suitable for agricultural operations, thanks to the long hours of sunlight, but Alaska is a food-importing area. In 1995 about 1m. acres was farmland and there were (in 1994) 520 farms and ranches with annual sales of \$1,000 or more; crops covered 28,940 acres. In 1997 the average farm had 1,804 acres.

Total value of agricultural products in 1994: \$27,766,000 of which \$2,828,000 was from feed crops, \$2,738,000 from vegetables (including potatoes), \$6.1m. from livestock and poultry, \$2,465,000 from dairy products and \$15,833,000 from greenhouse and nursery industries. Net income from farms in 1996 was \$10m.

At 1 Jan. 1995 there were 9,900 cattle and calves and 1,700 sheep and lambs; at 1 Dec. 1994, 2,000 hogs and pigs and 2,000 poultry. There were about 33,000 reindeer in western Alaska in 1994. Sales of reindeer meat and by-products in 1994 were valued at \$1,366,000.

Forestry. Of the 129m. forested acres of Alaska, 24m. acres are classified as timberland or commercial forest. The interior forest covers 115m. acres; more than 13m. acres are considered commercial forest, of which 3.4m. acres are in designated parks or wilderness and unavailable for harvest. The coastal rain forests

provide the bulk of commercial timber volume; of their 13.6m. acres, 7.6m. acres support commercial stands, of which 1.9m. acres are in parks or wilderness and unavailable for harvest. In 1992, 590m. bd ft of timber were harvested from private land for a total value of \$548.9m., and in 1993, 9.38m. bd ft from state land for \$342.6m.

There are 624 designated wilderness areas throughout the USA, covering a total of 104m. acres (42m. ha). Nearly 56% of the system is in Alaska (58.18m acres or 23.54m. ha).

Fisheries. The catch for 1993 was 2.7m. lb of fish and shellfish having a value to fishermen of \$905m. The most important species are salmon, crab, herring, halibut and pollock.

The Alaska Highway extends 1,523 miles from Dawson Creek, British Columbia, to Fairbanks, Alaska. It was built by the US Army in 1942, at a cost of \$138m. The greater portion of it, because it lies in Canada, is maintained by Canada.

Rail. There is a railway of 111 miles from Skagway to the town of Whitehorse, the White Pass and Yukon route, in the Canadian Yukon region (this service operates seasonally). The government-owned Alaska Railroad runs from Seward to Fairbanks, a distance of 471 miles. This is a freight service with only occasional passenger use. A passenger service operates from Anchorage to Fairbanks via Denali National Park in the tourist season.

Civil Aviation. In 1996 Air Alaska flew 180.1m. km and carried 11,578,200 passengers. Commercial passengers by air from Alaska's largest international airports Anchorage and Fairbanks in fiscal year 1994 numbered 4,358,437 at Anchorage and 721,496 at Fairbanks. General aviation aircraft in the state per 1,000 population is about 10 times the US average.

Shipping. Regular shipping services to and from the USA are furnished by 2 steamship and several barge lines operating out of Seattle and other Pacific coast ports. A Canadian company also furnishes a regular service from Vancouver, BC. Anchorage is the main port.

A 1,435 nautical-mile ferry system for motor cars and passengers (the 'Alaska Marine Highway') operates from Bellingham, Washington and Prince Rupert (British Columbia) to Juneau, Haines (for access to the Alaska Highway) and Skagway. A second system extends throughout the south-central region of Alaska linking the Cook Inlet area with Kodiak Island and Prince William Sound.

ARIZONA

KEY HISTORICAL EVENTS

Spaniards looking for sources of gold or silver entered Arizona in the 16th century, finding there people from several Native American groups, including Tohono O'odham, Navajo, Hopi and Apache. The first Spanish Catholic mission was founded in the early 1690s by Father Eusebio Kino, settlements were made in 1752 and a Spanish army headquarters was set up at Tucson in 1776. The area was governed by Mexico after the collapse of Spanish colonial power. Mexico ceded it to the USA in the Treaty of Guadalupe Hidalgo after the Mexican-American war (1848). Arizona was then part of New Mexico; the Gadsen Purchase (of land south of the Gila River) was added to it in 1853. The whole was organized as the Arizona Territory on 24 Feb. 1863.

Miners and ranchers began settling in the 1850s. Conflicts between Indian and immigrant populations intensified when troops were withdrawn to serve in the Civil War. The Navajo surrendered in 1865, but the Apache continued to fight, under Geronimo and other leaders, until 1886. Arizona was admitted to the Union as the 48th state in 1912.

Large areas of the state have been retained as Indian reservations and as parks to protect the exceptional desert and mountain landscape. In recent years this landscape and the Indian traditions have been used to attract tourist income.

TERRITORY AND POPULATION

Arizona is bounded north by Utah, east by New Mexico, south by Mexico, west by California and Nevada. Area, 114,006 sq. miles (295,276 sq. km), including 364 sq. miles (943 sq. km) of inland water. Of the total area in 1992, 28% was Indian Reservation, 17% was in individual or corporate ownership, 19% was held by the US Bureau of Land Management, 15% by the US Forest Service, 13% by the State and 8% by others. Census population on 1 April 2000 was 5,130,632, an increase of 40.90% over 1990. 87.5% of the population was urban in 1990. The rate of Arizona's population increase during the 1990s was the second-fastest in the USA, at 40%. Nevada is the only state to have had faster growth.

ARKANSAS**KEY HISTORICAL EVENTS**

In the 16th and 17th centuries French and Spanish explorers entered Arkansas, finding there tribes of Chaddo, Osage and Quapaw. The first European settlement was French, at Arkansas Post in 1686, and the area became part of French Louisiana. The USA bought Arkansas from France as part of the Louisiana Purchase in 1803, it was organized as a Territory in 1819 and entered the Union on 15 June 1836 as the 25th state.

The eastern plains by the Mississippi were settled by white plantation-owners who grew cotton with black slave labour. The rest of the state attracted a scattered population of small farmers. The plantations were the centre of political power. Arkansas seceded from the Union in 1861 and joined the Confederate States of America. At that time the slave population was about 25% of the total.

In 1868 the state was re-admitted to the Union. Attempts to integrate the black population into state life achieved little, and a policy of segregation was rigidly adhered to until the 1950s. In 1957 federal authorities ordered that high school segregation must end. The state governor called on the state militia to prevent desegregation; there was rioting, and federal troops entered Little Rock, the capital, to restore order. It was another 10 years before school segregation finally ended.

The main industrial development followed the discovery of large reserves of bauxite.

CALIFORNIA

KEY HISTORICAL EVENTS

There were many small Indian tribes, but no central power, when the area was discovered in 1542 by the Spanish navigator Juan Cabrillo. The Spaniards did not begin to establish missions until the 18th century, when the Franciscan friar Junipero Serra settled at San Diego in 1769. The missions became farming and ranching villages with large Indian populations. When the Spanish empire collapsed in 1821, the area was governed from newly independent Mexico.

The first wagon-train of American settlers arrived from Missouri in 1841. In 1846, during the war between Mexico and the USA, Americans in California proclaimed it to be part of the USA. The territory was ceded by Mexico on 2 Feb. 1848 and became the 31st state of the Union on 9 Sept. 1850.

Gold was discovered in 1848–49 and there was an immediate influx of population. The state remained isolated, however, until the development of railways in the 1860s. From then on the population doubled on average every 20 years. The sunny climate attracted fruit-growers, market-gardeners and wine producers. In the early 20th century the bright lights and cheap labour attracted film-makers to Hollywood, Los Angeles.

Southern California remained mainly agricultural with an Indian or Spanish-speaking labour force until after the Second World War. Now more than 90% of the population is urban, with the main manufacture being hi-technology equipment, much of it for the aerospace, computer and office equipment industries.

TERRITORY AND POPULATION

Land area, 155,973 sq. miles (403,971 sq. km). Census population, 1 April 2000, 33,871,648, an increase of 4,111,627, or 13·8%, over 1990. The numerical increase was the largest of any state between 1990 and 2000.

Population in 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Japanese</i>	<i>Chinese</i>	<i>Total (incl. all others)</i>	<i>Per sq. mile</i>

Of the 1990 population 50·1% were male, 92·6% were urban and 69% were 21 years old or older.

California has the largest Hispanic population of any state in the USA in terms of numbers and the second largest in terms of percentage of population. It is estimated that in 1999 there were 10,459,616 Hispanics living in California (31·6% of the overall population), representing a rise of 2,755,268 since 1990, the largest numeric rise of any state over the same period. During 2001 California is set to become the first state in the USA in which whites no longer form the majority, and by 2015 Hispanics are projected to form a majority. They are expected to constitute an outright majority by 2040.

COLORADO

KEY HISTORICAL EVENTS

Spanish explorers claimed the area for Spain in 1706; it was then the territory of the Arapaho, Cheyenne, Ute and other Plains and Great Basin Indians. Eastern Colorado, the hot, dry plains, passed to France in 1802 and then to the USA as part of the Louisiana Purchase in 1803. The rest remained Spanish, becoming Mexican when Spanish power in the Americas ended. In 1848, after war between Mexico and the USA, Mexican Colorado was ceded to the USA. A gold rush in 1859 brought a great influx of population, and in 1861 Colorado was organized as a Territory. The Territory officially supported the Union in the Civil War of 1861–65, but its settlers were divided and served on both sides.

Colorado became a state in 1876. Mining and ranching were the mainstays of the economy. In the 1920s the first large projects were undertaken to exploit the Colorado River. The Colorado River Compact was agreed in 1922, and the Boulder Dam (now Hoover Dam) was authorized in 1928. Since then irrigated agriculture has overtaken mining as an industry and is as important as ranching. In 1945 the Colorado-Big Thompson project diverted water by tunnel beneath the Rocky Mountains to irrigate 700,000 acres (284,000 ha) of northern Colorado. Now more than 80% of the population is urban, with the majority engaged in telecommunications, aerospace and computer technology.

TERRITORY AND POPULATION

Colorado is bounded north by Wyoming, northeast by Nebraska, east by Kansas, southeast by Oklahoma, south by New Mexico and west by Utah. Land area, 103,729 sq. miles (268,658 sq. km).

Population in 5 census years was:

CONNECTICUT

KEY HISTORICAL EVENTS

Formerly territory of Algonquian-speaking Indians, Connecticut was first colonized by Europeans during the 1630s, when English Puritans moved there from Massachusetts Bay. Settlements were founded in the Connecticut River Valley at Hartford, Saybrook, Wethersfield and Windsor in 1635. They formed an organized commonwealth in 1637. A further settlement was made at New Haven in 1638 and was united to the commonwealth under a royal charter in 1662. The charter confirmed the commonwealth constitution, drawn up by mutual agreement in 1639 and called the Fundamental Orders of Connecticut.

The area was agricultural and its population of largely English descent until the early 19th century. After the War of Independence Connecticut was one of the original 13 states of the Union. Its state constitution came into force in 1818 and survived with amendment until 1965 when a new one was adopted.

In the early 1800s a textile industry was established using local water power. By 1850 the state had more employment in industry than in agriculture, and immigration from the continent of Europe (and especially from southern and eastern Europe) grew rapidly throughout the 19th century. Some immigrants worked in whaling and iron-mining, but most sought industrial employment. Settlement was spread over a large number of small towns, with no single dominant culture.

Yale University was founded at New Haven in 1701. The US Coastguard Academy was founded in 1876 at New London, a former whaling port.

DELAWARE

KEY HISTORICAL EVENTS

Delaware was the territory of Algonquian-speaking Indians who were displaced by European settlement in the 17th century. The first settlers were Swedes who came in 1638 to build Fort Christina (now Wilmington), and colonize what they called New Sweden. Their colony was taken by the Dutch from New Amsterdam in 1655. In 1664 the British took the whole New Amsterdam colony, including Delaware, and called it New York.

In 1682 Delaware was granted to William Penn, who wanted access to the coast for his Pennsylvania colony. Union of the two colonies was unpopular, and Delaware gained its own government in 1704, although it continued to share a royal governor with Pennsylvania until the War of Independence. Delaware then became one of the 13 original states of the Union and the first to ratify the federal constitution (on 7 Dec. 1787).

The population was of Swedish, Finnish, British and Irish extraction. The land was low-lying and fertile, and the use of slave labour was legal. There was a significant number of black slaves, but Delaware was a border state during the Civil War (1861–65) and did not leave the Union.

19th-century immigrants were mostly European Jews, Poles, Germans and Italians. The north became industrial and densely populated, more so after the Second World War with the rise of the petrochemical industry. Industry in general profited from the opening of the Chesapeake and Delaware Canal in 1829; it was converted to a toll-free deep channel for ocean-going ships in 1919.

TERRITORY AND POPULATION

Delaware is bounded in the north by Pennsylvania, northeast by New Jersey, east by Delaware Bay, south and west by Maryland. Land area 1,982 sq. miles (5,133 sq. km). Census population, 1 April 2000, was 783,600, an increase of 17.6% since 1990. 73% of the population was urban in 1990.

DISTRICT OF COLUMBIA

KEY HISTORICAL EVENTS

The District of Columbia, organized in 1790, is the seat of the government of the USA, for which the land was ceded by the states of Maryland and Virginia to the USA as a site for the national capital. It was established under Acts of Congress in 1790 and 1791. Congress first met in it in 1800 and federal authority over it became vested in 1801. In 1846 the land ceded by Virginia (about 33 sq. miles) was given back.

TERRITORY AND POPULATION

The District forms an enclave on the Potomac River, where the river forms the southwest boundary of Maryland. The land area of the District of Columbia is 61 sq. miles (159 sq. km).

Census population, 1 April 2000, was 572,059 (100% urban), a decrease of 5.72% from that of 1990. Metropolitan statistical area of Washington, D.C.-Md.-Va. (1980), 3m. Density of population in the District, 1990, 9,884 per sq. mile. Population estimate (1999), 519,000. The Hispanic population in 1999 was estimated to be 38,453, up from 32,713 in 1990.

SOCIAL STATISTICS

Births, 1999, were 7,668 (14.8 per 1,000 population); deaths, 5,893 (11.4); (1996) infant mortality rate (per 1,000 live births), 14.9. Marriages (1997), 3,800 (7.3 per 1,000 population in 1995); divorces, 1,200 (1997), 2.3.

CLIMATE

Washington, Jan. 34°F (1.1°C), July 77°F (25°C). Annual rainfall 43" (1,064 mm). The District of Columbia belongs to the Atlantic Coast climate zone (see UNITED STATES: Climate).

CONSTITUTION AND GOVERNMENT

Local government, from 1 July 1878 until Aug. 1967, was that of a municipal corporation administered by a board of 3 commissioners, of whom 2 were appointed from civil life by the President, and confirmed by the Senate, for a term of 3 years each. The other commissioner was detailed by the President from the Engineer Corps of the Army. The Commission form of government was abolished in 1967 and a new Mayor Council instituted with officers appointed by the President with the advice and consent of the Senate. On 24 Dec. 1973 the appointed officers were replaced by an elected Mayor and councillors, with full legislative powers in local matters as from 1974. Congress retains the right to legislate, to veto or supersede the Council's acts. The 23rd amendment to the federal constitution (1961) conferred the right to vote in national elections. The District has 2 delegates in Congress who may vote in committees but not on the House floor.

RECENT ELECTIONS

In the 2000 presidential election Gore polled 171,923 votes; Bush, 18,073; Nader, 10,576.

CURRENT ADMINISTRATION

Mayor: Anthony Williams (D.), 1998–2002.

ECONOMY

Budget. The District's revenues are derived from a tax on real and personal property, sales taxes, taxes on corporations and companies, licences for conducting various businesses and from federal payments. The District of Columbia has no bonded debt not covered by its accumulated sinking fund.

Per capita personal income (1999) was \$38,228.

ENERGY AND NATURAL RESOURCES

Water. The total area covered by water is approximately 7 sq. miles.

Minerals. Non-fuel mineral production is included in figures for Delaware.

INDUSTRY

The main industries are government service, service, wholesale and retail trade, finance, real estate, insurance, communications, transport and utilities.

COMMUNICATIONS

Roads. Within the District are 340 miles of bus routes. There are 1,102 miles of streets maintained by the District; of these, 673 miles are local streets, 262 miles are major arterial roads. In 1998, 229,000 motor vehicles were registered.

Rail. There is a metro in Washington extending to 130 km, and 2 commuter rail networks.

Civil Aviation. The District is served by 3 general airports; across the Potomac River in Arlington, Va., is National Airport; in Chantilly, Va., is Dulles International Airport; and in Maryland is Baltimore–Washington International Airport.

SOCIAL INSTITUTIONS

Justice. The death penalty was declared unconstitutional in the District of Columbia on 14 Nov. 1973. In 1996 there were 9,376 prisoners in state correctional institutions.

The District's Court system is the Judicial Branch of the District of Columbia. It is the only completely unified court system in the United States, possibly because of the District's unique city-state jurisdiction. Until the District of Columbia Court Reform and Criminal Procedure Act of 1970, the judicial system was almost entirely in the hands of Federal government. Since that time, the system has been similar in most respects to the autonomous systems of the states.

Religion. The largest churches are the Protestant and Roman Catholic Christian churches; there are also Jewish, Eastern Orthodox and Islamic congregations.

Education. In 1996 there were an estimated 105,700 pupils enrolled at elementary and secondary public schools. Average expenditure per pupil in 1997 was \$8,167.

Higher education is given through the Consortium of Universities of the Metropolitan Washington Area, which consists of six universities and three colleges: Georgetown University, founded in 1795 by the Jesuit Order; George Washington University, non-sectarian founded in 1821; Howard University, founded in 1867; Catholic University of America, founded in 1887; American University (Methodist) founded in 1893; University of D.C., founded 1976; Gallaudet College, founded 1864; Trinity College, founded 1897. There are altogether 18 institutes of higher education.

Health. The District government provides primary health care for residents, mainly through its Department of Human Services. In 1994 there were 12 community hospitals with 4,000 beds.

Welfare. There were 77,000 beneficiaries of social security in 1996 including 53,000 retired workers and dependants, 15,000 survivors of deceased workers and 9,000 disabled workers and dependants. Total annual payments were \$539m.

FLORIDA

KEY HISTORICAL EVENTS

There were French and Spanish settlements in Florida in the 16th century, of which the Spanish, at St Augustine in 1565, proved permanent. Florida was claimed by Spain until 1763 when it passed to Britain. Although regained by Spain in 1783, the British used it as a base for attacks on American forces during the war of 1812. Gen. Andrew Jackson captured Pensacola for the USA in 1818. In 1819 a treaty was signed which ceded Florida to the USA with effect from 1821 and it became a Territory of the USA in 1822.

Florida had been the home of the Apalachee and Timucua Indians. After 1770 groups of Creek Indians began to arrive as refugees from the European-Indian wars. These 'Seminoles' or runaways attracted other refugees including slaves, the recapture of whom was the motive for the first Seminole War of 1817–18. A second war followed in 1835–42, when the Seminoles retreated to the Everglades swamps. After a third war in 1855–58 most Seminoles were forced or persuaded to move to reserves in Oklahoma.

Florida became a state in 1845. About half of the population were black slaves. At the outbreak of Civil War in 1861 the state seceded from the Union.

During the 20th century Florida continued to grow fruit and vegetables, but real-estate development (often for retirement) and the growth of tourism and the aerospace industry set it apart from other ex-plantation states.

GEORGIA

KEY HISTORICAL EVENTS

Originally the territory of Creek and Cherokee tribes, Georgia was first settled by Europeans in the 18th century. James Oglethorpe founded Savannah in 1733, intending it as a colony which offered a new start to debtors, convicts and the poor. Settlement was slow until 1783, when growth began in the cotton-growing areas west of Augusta. The Indian population was cleared off the rich cotton land and moved beyond the Mississippi. Georgia became one of the original 13 states of the Union.

A plantation economy developed rapidly, using slave labour. In 1861 Georgia seceded from the Union and became an important source of supplies for the Confederate cause, although some northern areas never accepted secession and continued in sympathy with the Union during the Civil War. At the beginning of the war 56% of the population were white, descendants of British, Austrian and New England immigrants; the remaining 44% were black slaves.

The city of Atlanta, which grew as a railway junction, was destroyed during the war but revived to become the centre of southern states during the reconstruction period. Atlanta was confirmed as state capital in 1877. Also in Atlanta were developed successive movements for black freedom in social, economic and political life. The Southern Christian Leadership Conference, led by Martin Luther King (assassinated in 1968), was based in King's native city of Atlanta.

HAWAII

KEY HISTORICAL EVENTS

The islands of Hawaii were settled by Polynesian immigrants, probably from the Marquesas Islands, about AD 400. A second major immigration, from Tahiti, occurred around 800–900. In the late 18th century all the islands of the group were united into one kingdom by Kamehameha I. Western exploration began in 1778, and Christian missions were established after 1820. Europeans called Hawaii the Sandwich Islands. The main foreign states interested were the USA, Britain and France. Because of the threat imposed by their rivalry, Kamehameha III placed Hawaii under US protection in 1851. US sugar-growing companies became dominant in the economy and in 1887 the USA obtained a naval base at Pearl Harbour. A struggle developed between forces for and against annexation by the USA. In 1893 the monarchy was overthrown. The republican government agreed to be annexed to the USA in 1898, and Hawaii became a US Territory in 1900.

The islands and the naval base were of great strategic importance during the Second World War, when the Japanese attack on Pearl Harbour brought the USA into the war.

Hawaii became the 50th state of the Union in 1959. The 19th-century plantation economy encouraged the immigration of workers, especially from China and Japan. Hawaiian laws, religions and culture were gradually adapted to the needs of the immigrant community.

TERRITORY AND POPULATION

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 28° 15' N. lat. and 154° 40' and 178° 25' W. long., about 2,090 nautical miles southwest of San Francisco. There are 137 named islands and islets in the group, of which 7 major and 5 minor islands are inhabited. Land area, 6,423 sq. miles (16,636 sq. km). Census population, 1 April 2000, 1,211,537, an increase of 9.3% since 1990; density was 172.5 per sq. mile in 1990. 89% of the population was urban and 51% male in 1990.

The principal islands are Hawaii, 4,028 sq. miles, population 1990, 120,317; Maui, 727 sq. miles, population 91,361; Oahu, 600 sq. miles, population 836,231; Kauai, 552 sq. miles, population 50,947; Molokai, 260 sq. miles, population 6,717; Lanai, 141 sq. miles, population 2,426; Niihau, 70 sq. miles, population 230; Kahoolawe, 45 sq. miles (uninhabited). There were 22,873 resident marriages (7.4 per 1,000 population), and divorces and annulments numbered 4,376 (4.1 per 1,000 population) in 1999. Inter-marriage between the races is common. In 1998, 46.3% of marriages were inter-racial. 58.3% were non-resident marriages.

All the islands have a tropical climate, with an abrupt change in conditions between windward and leeward sides, most marked in rainfall. Temperatures vary little. Average temperatures in Honolulu in 1999: warmest month 81.4°F, coolest month 72.9°F. Annual rainfall in Honolulu (1997) 22.02".

IDAHO

KEY HISTORICAL EVENTS

The original people of Idaho were Kutenai, Kalispel, Nez Percé and other tribes, living on the Pacific watershed of the northern Rocky Mountains. European exploration began in 1805, and after 1809 there were trading posts and small settlements, with fur-trapping as the primary economic activity. The area was disputed between Britain and the USA until 1846 when British claims were dropped. In 1860 gold and silver were found, and there was a rush of immigrant prospectors. The newly enlarged population needed organized government. An area including that which is now Montana was created a Territory in March 1863. Montana was separated from it in 1864. Population growth continued, stimulated by refugees from the Confederate states after the Civil War and by settlements of Mormons from Utah.

Fur-trapping and mining gave way to farming, especially of grains, as the main economic activity. Idaho became a state in 1890, with its capital at Boise. The Territory capital, Idaho City, had been a gold-mining boom town in the 1860s whose population (about 40,000 at its height) was the largest in the Pacific Northwest. The population declined to 1,000 by 1869.

During the 20th century the Indian population shrunk to nearly 1%. The Mormon community has grown to include much of southeastern Idaho and more than half the church-going population of the state.

Industrial history has been influenced by the development of the Snake River of southern Idaho for hydro-electricity and irrigation, especially at the American Falls and reservoir. Processing food, minerals and timber are important to the economy. The population, however, remains mainly sparse and rural. Rapid growth of high technology companies in Idaho's metropolitan areas has prompted economic diversification and rapid population growth.

TERRITORY AND POPULATION

Idaho is within the Rocky Mountains and bounded north by Canada, east by Montana and Wyoming, south by Nevada and Utah, west by Oregon and Washington. Land area, 82,751 sq. miles (214,325 sq. km). ILLINOIS

KEY HISTORICAL EVENTS

Territory of a group of Algonquian-speaking tribes, Illinois was explored first by the French in 1673. France claimed the area until 1763 when, after the French and Indian War, it was ceded to Britain along with all the French land east of the Mississippi. In 1783 Britain recognized the US' title to Illinois, which became part of the North West Territory of the USA in 1787, and of Indiana Territory in 1800. Illinois became a Territory in its own right in 1809, and a state in 1818.

Settlers from the eastern states moved on to the fertile farmland, immigration increasing greatly with the opening in 1825 of the Erie Canal from New York along which settlers could move west and their produce back east for sale. Chicago was incorporated as a city in 1837 and quickly became the transport, trading and distribution centre of the middle west. Once industrial growth had begun there, a further wave of immigration took place in the 1840s, mainly of European refugees looking for work. This movement continued with varying force until the 1920s, when it was largely replaced by immigration of black work-seekers from the southern states.

During the 20th century the population became largely urban and heavy industry was established along an intensive network of rail and waterway routes. Chicago recovered from a destructive fire in 1871 to become the hub of this network and at one time the second largest American city.

INDIANA

KEY HISTORICAL EVENTS

The area was inhabited by Algonquian-speaking tribes when the first European explorers (French) laid claim to it in the 17th century. They established some fortified trading posts but there was little settlement. In 1763 the area passed to Britain, with other French-claimed territory east of the Mississippi. In 1783 Indiana became part of the North West Territory of the USA; it became a separate territory in 1800 and a state in 1816. Until 1811 there had been continuing conflict with the Indian inhabitants, who were then defeated at Tippecanoe.

Early farming settlement was by families of British and German descent, including Amish and Mennonite communities. Later industrial development offered an incentive for more immigration from Europe, and, later, from the southern states. In 1906 the town of Gary was laid out by the United States Steel Corporation and named after its chairman, Elbert H. Gary. The industry flourished on navigable water midway between supplies of iron ore and of coal. Trade and distribution in general benefited from Indiana Port on Lake Michigan, especially after the opening of the St Lawrence Seaway in 1959. The Ohio River was also exploited for carrying freight.

Indianapolis was built after 1821 and became the state capital in 1825. Natural gas was discovered in the neighbourhood in the late 19th century, and this stimulated the growth of a motor industry, celebrated with the Indianapolis 500 race, held annually since 1911.

TERRITORY AND POPULATION

Indiana is bounded west by Illinois, north by Michigan and Lake Michigan, east by Ohio and south by Kentucky across the Ohio River. Land area, 35,870 sq. miles (92,903 sq. km). IOWA

KEY HISTORICAL EVENTS

Originally the territory of the Iowa Indians, the area was explored by the Frenchmen Marquette and Joliet in 1673. French trading posts were set up, but there was little other settlement. In 1803 the French sold their claim to Iowa to the USA as part of the Louisiana Purchase. The land was still occupied by Indians but, in the 1830s, the tribes sold their land to the US government and migrated to reservations. Iowa became a US Territory in 1838 and a state in 1846.

The state was settled by immigrants drawn mainly from neighbouring states to the east. Later there was more immigration from Protestant states of northern Europe. The land was extremely fertile and most immigrants came to farm. Not all the Indian population had accepted the cession and there were some violent confrontations, notably the murder of settlers at Spirit Lake in 1857. The capital, Des Moines, was founded in 1843 as a fort to protect Indian rights. It expanded rapidly with the growth of a local coal field after 1910.

KANSAS

KEY HISTORICAL EVENTS

The area was explored from Mexico in the 16th century, when Spanish travellers found groups of Kansas, Wichita, Osage and Pawnee tribes. The French claimed Kansas in 1682 and they established a valuable fur trade with local tribes in the 18th century. In 1803 the area passed to the USA as part of the Louisiana Purchase and became a base for pioneering trails further west. After 1830 it was 'Indian Territory' and a number of tribes displaced from eastern states were settled there. In 1854 the Kansas Territory was created and opened for white settlement. The early settlers were farmers from Europe or New England, but the Territory's position brought it into contact with southern ideas also. Until 1861 there were frequent outbreaks of violence over the issue of slavery. Slavery had been excluded from the future Territory by the Missouri Compromise of 1820, but the 1854 Kansas-Nebraska Act had affirmed the principle of 'popular sovereignty' to settle the issue, which was then fought out by opposing factions throughout 'Bleeding Kansas'.

Kansas finally entered the Union (as a non-slavery state) in 1861; the part of Colorado which had formed part of the Kansas Territory was then separated from it.

The economy developed through a combination of cattle-ranching and railways. Herds were driven to the railheads and shipped from vast stockyards, or slaughtered and processed in railhead meat-packing plants. Wheat and sorghum also became important once the plains could be ploughed on a large scale.

TERRITORY AND POPULATION

Kansas is bounded north by Nebraska, east by Missouri, with the Missouri River as boundary in the northeast, south by Oklahoma and west by Colorado. Land area, 81,823 sq. miles (211,922 sq. km). KENTUCKY

KEY HISTORICAL EVENTS

Lying west of the Appalachians and south of the Ohio River, the area was the meeting place and battleground for the eastern Iroquois and the southern Cherokees. Northern Shawnees also penetrated. The first successful white settlement took place in 1769 when Daniel Boone reached the Bluegrass plains from the eastern, trans-Appalachian, colonies. After 1783 immigration from the east was rapid, settlers travelling by river or crossing the mountains by the Cumberland Gap. The area was originally attached to Virginia but became a separate state in 1792.

Large plantations dependent on slave labour were established, as were small farms worked by white owners. The state became divided on the issue of slavery, although plantation interests (mainly producing tobacco) dominated state government. In the event the state did not secede in 1861, and the majority of citizens supported the Union. Public opinion swung round in support of the south during the difficulties of the reconstruction period.

The eastern mountains became an important coal-mining area, tobacco-growing continued and the Bluegrass plains produced livestock, including especially fine thoroughbred horses.

LOUISIANA

KEY HISTORICAL EVENTS

Originally the Territory of Choctaw and Caddo tribes, the whole area was claimed for France in 1682. The French founded New Orleans in 1718 and it became the centre of a crown colony in 1731. During the wars which the European powers fought over their American interests, the French ceded the area west of the Mississippi (most of the present state) to Spain in 1762 and the eastern area, north of New Orleans, to Britain in 1763. The British section passed to the USA in 1783, but France bought back the rest from Spain in 1800, including New Orleans and the mouth of the Mississippi. The USA, fearing to be excluded from a strategically important and commercially promising shipping area, persuaded France to sell Louisiana again in 1803. The present states of Missouri, Arkansas, Iowa, North Dakota, South Dakota, Nebraska and Oklahoma were included in the purchase.

LOUISIANA

The area became the Territory of New Orleans in 1804 and was admitted to the Union as a state in 1812. The economy at first depended on cotton and sugarcane plantations. The population was of French, Spanish and black descent, with a growing number of American settlers. Plantation interests succeeded in achieving secession in 1861, but New Orleans was occupied by the Union in 1862. Planters re-emerged in the late 19th century and imposed rigid segregation of the black population, denying them their new rights.

The state has become mainly urban industrial, with the Mississippi ports growing rapidly. There is petroleum and natural gas, and a strong tourist industry based on the French culture and Caribbean atmosphere of New Orleans.

TERRITORY AND POPULATION

Louisiana is bounded north by Arkansas, east by Mississippi, south by the Gulf of Mexico and west by Texas. Land area, 43,566 sq. miles (112,836 sq. km). Census population, 1 April 2000, 4,468,976, an increase of 5.9% since 1990. 68.1% of the population was urban in 1990.

MAINE

KEY HISTORICAL EVENTS

Originally occupied by Algonquian-speaking tribes, the Territory was disputed between different groups of British settlers, and between the British and French, throughout the 17th and most of the 18th centuries. After 1652 it was governed as part of Massachusetts, and French claims finally failed in 1763. Most of the early settlers were English and Protestant Irish, with many Quebec French.

The Massachusetts settlers had gained control when the original colonist, Sir Ferdinando Gorges, supported the losing royalist side in the English civil war. Their control was questioned during the English-American war of 1812, when Maine residents claimed that the Massachusetts government did not protect them against British raids. Maine was separated from Massachusetts and entered the Union as a state in 1820.

Maine is a mountainous state and even the coastline is rugged, but the coastal belt is where most settlement has developed. In the 19th century there were manufacturing towns making use of cheap water-power, and the rocky shore supported a shell-fish industry. The latter still flourishes, together with intensive horticulture, producing potatoes and fruit. The other main economic development has been in exploiting the forests for timber, pulp and paper.

The capital is Augusta, a river trading post which was fortified against Indian attacks in 1754, incorporated as a town in 1797 and chosen as capital in 1832.

TERRITORY AND POPULATION

Maine is bounded west, north and east by Canada, southeast by the Atlantic, south and southwest by New Hampshire. Land area, 30,865 sq. miles (79,931 sq. km). Census population, 1 April 2000, 1,274,923, an increase of 3.8% since 1990. 44.6% of the population was urban in 1990.

Population for 5 census years was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Asiatic</i>	<i>Total</i>	<i>Per sq. mile</i>

MARYLAND

KEY HISTORICAL EVENTS

The first European visitors found groups of Algonquian-speaking tribes, often under attack by Iroquois from further north. The first white settlement was made by the Calvert family, British Roman Catholics, in 1634. The settlers received some legislative rights in 1638. In 1649 their assembly passed the Act of Toleration, granting freedom of worship to all Christians. A peace treaty was signed with the Iroquois in 1652, after which it was possible for farming settlements to expand north and west. The capital (formerly at St Mary's City) was moved to Annapolis in 1694. Baltimore, which became the state's main city, was founded in 1729.

The first industry was tobacco-growing, which was based on slave-worked plantations. There were also many immigrant British small farmers, tradesmen and indentured servants.

At the close of the War of Independence the treaty of Paris was ratified in Annapolis. Maryland became a state of the Union in 1788. In 1791 the state ceded land for the new federal capital, Washington, and its economy has depended on the capital's proximity ever since. Baltimore also grew as a port and industrial city, attracting much European immigration in the 19th century. Although strong sympathy for the south was expressed, Maryland remained within the Union in the Civil War albeit under the imposition of martial law.

TERRITORY AND POPULATION

Maryland is bounded north by Pennsylvania, east by Delaware and the Atlantic, south by Virginia and West Virginia, with the Potomac River forming most of the boundary, and west by West Virginia. MASSACHUSETTS

KEY HISTORICAL EVENTS

The first European settlement was at Plymouth, when the *Mayflower* landed its company of English religious separatists in 1620. In 1626–30 more colonists arrived, the main body being a large company of English Puritans who founded a Puritan commonwealth. This commonwealth, of about 1,000 colonists led by John Winthrop, became the Massachusetts Bay Colony and was founded under a company charter. Following disagreement between the English government and the colony the charter was withdrawn in 1684, but in 1691 a new charter united a number of settlements under the name of Massachusetts Bay. The colony's government was rigidly theocratic.

Shipbuilding, iron-working and manufacturing were more important than farming from the beginning, the land being poor. The colony was Protestant and of English descent until the War of Independence. The former colony adopted its present constitution in 1780. In the struggle which ended in the separation of the American colonies from the mother country, Massachusetts took the foremost part, and on 6 Feb. 1788 became the 6th state to ratify the US constitution. The state acquired its present boundaries (having previously included Maine) in 1820.

UNITED STATES OF AMERICA

During the 19th century industrialization and immigration from Europe both increased while Catholic Irish and Italian immigrants began to change the population's character. The main inland industry was textile manufacture, the main coastal occupation was whaling; both have now gone. Boston has remained the most important city of New England, attracting a large black population since 1950.

KEY HISTORICAL EVENTS

The French were the first European settlers, establishing a fur trade with the local Algonquian Indians in the late 17th century. They founded Sault Ste Marie in 1668 and Detroit in 1701. In 1763 Michigan passed to Britain, along with other French territory east of the Mississippi, and from Britain it passed to the USA in 1783. Britain, however, kept a force at Detroit until 1796, and recaptured Detroit in 1812. Regular American settlement did not begin until later. The Territory of Michigan (1805) had its boundaries extended after 1818 and 1834. It was admitted to the Union as a state (with its present boundaries) in 1837.

During the 19th century there was rapid industrial growth, especially in mining and metalworking. The largest groups of immigrants were British, German, Irish and Dutch. Other significant groups came from Scandinavia, Poland and Italy. Many groups of immigrants came to settle as miners, farmers and industrial workers. The motor industry became dominant, especially in Detroit. Lake Michigan ports shipped bulk cargo, especially iron ore and grain.

Detroit was the capital until 1847, when that function passed to Lansing. Detroit remained, however, an important centre of flour-milling and shipping and, after the First World War, of the motor industry.

TERRITORY AND POPULATION

Michigan is divided into two by Lake Michigan. The northern part is bounded south by the lake and by Wisconsin, west and north by Lake Superior, east by the North Channel of Lake Huron; between the two latter lakes the Canadian border runs through straits at Sault Ste Marie. The southern part is bounded in the west and north by Lake Michigan, east by Lake Huron, Ontario and Lake Erie, south by Ohio and Indiana. Area, 58,110 sq. miles (150,544 sq. km). Census population, 1 April 2000, 9,938,444, an increase of 6.9% since 1990. 70.5% of the population was urban in 1990.

Population of 5 federal census years was:

MINNESOTA

KEY HISTORICAL EVENTS

Minnesota remained an Indian territory until the middle of the 19th century, the main groups being Chippewa and Sioux, many of whom are still there. In the 17th century there had been some French exploration, but no permanent settlement. After passing under the nominal control of France, Britain and Spain, the area became part of the Louisiana Purchase and so was sold to the USA in 1803.

Fort Snelling was founded in 1819. Early settlers came from other states, especially New England, to exploit the great forests. Lumbering gave way to homesteading, and the American settlers were joined by Germans, Scandinavians and Poles. Agriculture, mining and forest industries became the mainstays of the economy. Minneapolis, founded as a village in 1856, grew first as a lumber centre, processing the logs floated down the Minnesota River, and then as a centre of flour-milling and grain marketing. St Paul, its twin city across the river, became Territorial capital in 1849 and state capital in 1858. St Paul also stands at the head of navigation on the Mississippi, which rises in Minnesota.

The Territory (1849) included parts of North and South Dakota, but at its admission to the Union in 1858, the state of Minnesota had its present boundaries.

TERRITORY AND POPULATION

Minnesota is bounded north by Canada, east by Lake Superior and Wisconsin, with the Mississippi River forming the boundary in the southeast, south by Iowa, west by

MISSISSIPPI

KEY HISTORICAL EVENTS

Mississippi was one of the territories claimed by France after the 17th century and ceded to Britain in 1763. The indigenous people were Choctaw and Natchez. French settlers at first traded amicably with them, but in the course of three wars (1716, 1723 and 1729) the French allied with the Choctaw to drive the Natchez out. During hostilities the Natchez massacred the settlers of Fort Rosalie, which the French had founded in 1716 and which was later renamed Natchez.

In 1783 the area became part of the USA except for Natchez which was under Spanish control until 1798. The United States then made it the capital of the Territory of Mississippi. The boundaries of the Territory were extended in 1804 and again in 1812. In 1817 it was divided into two territories, with the western part becoming the state of Mississippi. (The eastern part became the state of Alabama in 1819.) The city of Jackson was laid out in 1822 as the new state capital.

A cotton plantation economy developed, based on black slave labour, and by 1860 the majority of the population was black. Mississippi joined the Confederacy during the Civil War. After defeat and reconstruction there was a return to rigid segregation and denial of black rights. This situation lasted until the 1960s. There was a black majority until the Second World War, when out-migration began to change the pattern. By 1990 about 35% of the population was black, and manufacture (especially clothing and textiles) had become the largest single employer of labour.

MISSOURI

KEY HISTORICAL EVENTS

Territory of several Indian groups, including the Missouri, the area was not settled by European immigrants until the 18th century. The French founded Ste Genevieve in 1735, partly as a lead-mining community. St Louis was founded as a fur-trading base in 1764. The area was nominally under Spanish rule from 1770 until 1800 when it passed back to France. In 1803 the USA bought it as part of the Louisiana Purchase.

St Louis was made the capital of the whole Louisiana Territory in 1805, and of a new Missouri Territory in 1812. In that year American immigration increased markedly. The Territory became a state in 1821, but there had been bitter disputes between slave-owning and anti-slavery factions, with the former succeeding in obtaining statehood without the prohibition of slavery required of all other new states north of latitude 36° 30'; this was achieved by the Missouri Compromise of 1820. The Compromise was repealed in 1854 and declared unconstitutional in 1857. During the Civil War the state held to the Union side, although St Louis was placed under martial law.

With the development of steamboat traffic on the Missouri and Mississippi rivers, and the expansion of railways, the state became the transport hub of all western movement. Lead and other mining remained important, as did livestock farming. European settlers came from Germany, Britain and Ireland.

MONTANA

KEY HISTORICAL EVENTS

Originally the territory of many groups of Indian hunters including the Sioux, Cheyenne and Chippewa, Montana was not settled by American colonists until the 19th century. The area passed to the USA with the Louisiana Purchase of 1803, but the area west of the Rockies was disputed with Britain until 1846. Trappers and fur-traders were the first immigrants, and the fortified trading post at Fort Benton (1846) became the first permanent settlement. Colonization increased when gold was found in 1862. Montana was created a separate Territory (out of Idaho and Dakota Territories) in 1864. In 1866 large-scale grazing of sheep and cattle was allowed, and this provoked violent confrontation with the indigenous people whose hunting lands were invaded. Indian wars led to the defeat of federal forces at Little Bighorn in 1876 and at Big Hole Basin in 1877, but the Indians could not continue the fight and they had been moved to reservations by 1880. Montana became a state in 1889.

Helena, the capital, was founded as a mining town in the 1860s. In the early 20th century there were many European immigrants who settled as farmers or in the mines, especially in copper-mining at Butte.

TERRITORY AND POPULATION

Montana is bounded north by Canada, east by North and South Dakota, south by Wyoming and west by Idaho and the Bitterroot Range of the Rocky Mountains. Land area, 145,556 sq. miles (336,991 sq. km). US Bureau of Indian Affairs (1990) administered 5,574,835 acres, of which 2,663,385 were allotted to tribes. NEBRASKA

KEY HISTORICAL EVENTS

The Nebraska region was first reached by Europeans from Mexico under the Spanish general Coronado in 1541. It was ceded by France to Spain in 1763, retroceded to France in 1801, and sold by Napoleon to the USA as part of the Louisiana Purchase in 1803. During the 1840s the Platte River valley became an established trail for thousands of pioneers' wagons heading for Oregon and California. The need to serve and protect the trail led to the creation of Nebraska as a Territory in 1854. In 1862 the Homestead Act opened the area for settlement, but colonization was not very rapid until the Union Pacific Railroad was completed in 1869. The largest city, Omaha, developed as the starting point of the Union Pacific and became one of the largest railway towns in the country.

Nebraska became a state in 1867, with approximately its present boundaries except that it later received small areas from the Dakotas. Many early settlers were from Europe, brought in by railway-company schemes, but from the late 1880s eastern Nebraska suffered catastrophic drought. Crop and stock farming recovered, but crop growing was only established in the west by means of irrigation.

TERRITORY AND POPULATION

Nebraska is bounded in the north by South Dakota, with the Missouri River forming the boundary in the northeast and the boundary with Iowa and Missouri to the east, south by Kansas, southwest by Colorado and west by Wyoming. KEY HISTORICAL EVENTS

The area was part of Spanish America until 1821, when it became part of the newly independent state of Mexico. Following a war between Mexico and the USA, Nevada was ceded to the USA as part of California in 1848. Settlement began in 1849, and the area was separated from California and joined with Utah Territory in 1850. In 1859 a rich deposit of silver was found in the Comstock Lode. Virginia City was founded as a mining town and immigration increased rapidly. Nevada Territory was formed in 1861. During the Civil War the Federal government, allegedly in order to obtain the wealth of silver for the Union cause, agreed to admit Nevada to the Union in 1864 as the 36th state. Areas of Arizona and Utah Territories were added to it in 1866-67.

The mining boom lasted until 1882, by which time cattle ranching had become equally important in the valleys where the climate is less arid. Carson City, the capital, developed in association with the nearby mining industry. The largest cities, Las Vegas and Reno, grew most in the 20th century with the building of the Hoover dam, the introduction of legal gambling and of easily obtained divorce.

After 1950 much of the desert area was adopted by the Federal government for weapons testing and other military purposes.

TERRITORY AND POPULATION

Nevada is bounded north by Oregon and Idaho, east by Utah, southeast by Arizona, with the Colorado River forming most of the boundary, south and west by California. Land area, 109,889 sq. miles (284,613 sq. km). The federal government (fiscal year 1995) owned 54,159,458 acres, or 77.1% of the land area.

Census population on 1 April 2000, 1,998,257, an increase of 66.3% since 1990. Population in 5 census years was:

NEW HAMPSHIRE

KEY HISTORICAL EVENTS

The area was part of a grant by the English crown made to John Mason and fellow-colonists, and was first settled in 1623. In 1629 an area between the Merrimack and Piscataqua rivers was called New Hampshire. More settlements followed, and in 1641 they were taken under the jurisdiction of the governor of Massachusetts. New Hampshire became a separate colony in 1679.

NEW HAMPSHIRE

After the War of Independence New Hampshire became one of the 13 original states of the Union, drawing up its constitution in 1784 and revising it on accession to the Union in 1792.

The settlers were Protestants from Britain and Northern Ireland. They developed manufacturing industries, especially shoe-making, textiles and clothing, to which large numbers of French Canadians were attracted after the Civil War.

Portsmouth, originally a fishing settlement, was the colonial capital and is the only seaport. In 1808 the state capital was moved to Concord (having had no permanent home since 1775); Concord produced the Concord Coach which was widely used on the stagecoach routes of the West until at least 1900.

TERRITORY AND POPULATION

New Hampshire is bounded in the north by Canada, east by Maine and the Atlantic, south by Massachusetts and west by Vermont. Land area, 8,993 sq. miles (23,292 sq. km). Census population, 1 April 2000, 1,235,786, an increase of 11.4% since 1990.

NEW JERSEY

KEY HISTORICAL EVENTS

Originally the territory of Delaware Indians, the area was first settled by immigrant colonists in the early 17th century, when Dutch and Swedish traders established fortified posts on the Hudson and Delaware Rivers. The Dutch took control but lost it to the English in 1664. In 1676 the English divided the area in two; the eastern portion was assigned to Sir George Carteret and the western granted to Quaker settlers. This division lasted until 1702 when New Jersey was united as a colony of the Crown and placed under the jurisdiction of the governor of New York. It became a separate colony in 1738.

During the War of Independence crucial battles were fought at Trenton, Princeton and Monmouth. New Jersey became the 3rd state of the Union in 1787. Trenton, the state capital since 1790, began as a Quaker settlement and became an iron-working town. Industrial development grew rapidly, there and elsewhere in the state, after the opening of canals and railways in the 1830s. Princeton, also a Quaker settlement, became an important post on the New York road; the college of New Jersey (Princeton University) was transferred there from Newark in 1756.

The need for supplies in the Civil War stimulated industry and New Jersey became a manufacturing state. The growth beyond its borders of New York and Philadelphia, however, produced a pattern of commuting to employment in both centres. By 1980 about 60% of the state's population lived within 30 miles of New York.

NEW MEXICO

KEY HISTORICAL EVENTS

The first European settlement was established in 1598. Until 1771 New Mexico was the Spanish kings' 'Kingdom of New Mexico'. In 1771 it was annexed to the northern province of New Spain. When New Spain won its independence in 1821, it took the name of Republic of Mexico and established New Mexico as its northernmost department. Ceded to the USA in 1848 after war between the USA and Mexico, the area was organized as a Territory in 1850, by which time its population was Spanish and Indian. There was frequent conflict, especially between new settlers and raiding parties of Navajo and Apaches. The Indian war lasted from 1861 until 1866, and from 1864–68 about 8,000 Navajo were imprisoned at Bosque Redondo.

The boundaries were altered several times when land was taken into Texas, Utah, Colorado and lastly (1863) Arizona. New Mexico became a state in 1912.

Settlement proceeded by means of irrigated crop-growing and Mexican-style ranching. During the Second World War the desert areas were brought into use as testing zones for atomic weapons. Mineral extraction also developed, especially after the discovery of uranium and petroleum.

TERRITORY AND POPULATION

New Mexico is bounded north by Colorado, northeast by Oklahoma, east by Texas, south by Texas and Mexico and west by Arizona. Land area, 121,365 sq. miles (314,334 sq. km). The Bureau of Indian Affairs held 7.3m. acres; the State of New Mexico held 9.4m. acres; 34.4m. acres were privately owned.

Census population, 1 April 2000, 1,819,046, an increase of 20.1% since 1990. 73% of the population was urban in 1990.

The population in 5 census years was:

Before 1930 New Mexico was largely a Spanish-speaking state, but after 1945 an influx of population from other states considerably reduced the percentage of persons of Spanish origin or descent. However, in recent years the percentage of the Hispanic population has begun to rise again. In 1999 the Hispanic population was estimated to be 708,407, a rise of 22.3% on the 1990 census figure of 579,227. NEW YORK STATE

KEY HISTORICAL EVENTS

The first European immigrants came in the 17th century, when there were two powerful Indian groups in rivalry: the Iroquois confederacy (Mohawk, Oneida,

Onondaga, Cayuga and Seneca) and the Algonquian-speaking Mohegan and Munsee. The Dutch made settlements at Fort Orange (now Albany) in 1624 and at New Amsterdam in 1625, trading with the Indians for furs. In the 1660s there was conflict between the Dutch and the British in the Caribbean; as part of the concluding treaty the British in 1664 received Dutch possessions in the Americas, including New Amsterdam, which they renamed New York.

In 1763 the Treaty of Paris ended war between the British and the French in North America (in which the Iroquois had allied themselves with the British). Settlers of British descent in New England then felt confident enough to expand westward into the area. The climate of northern New York being severe, most settled in the Hudson river valley. After the War of Independence New York became the 11th state of the Union (1778), having first declared itself independent of Britain in 1777.

The economy depended on manufacturing, shipping and other means of distributing goods, and trade. During the 19th century New York became the most important city in the USA. Its manufacturing industries, especially clothing, attracted thousands of European immigrants. Industrial development spread along the Hudson-Mohawk valley, which was made the route of the Erie Canal (1825) linking New York with Buffalo on Lake Erie and thus with the developing farmlands of the middle west.

TERRITORY AND POPULATION

New York is bounded west and north by Canada with Lake Erie, Lake Ontario and the St Lawrence River forming the boundary; east by Vermont, Massachusetts and Connecticut, southeast by the Atlantic, south by New Jersey and Pennsylvania. CONSTITUTION AND GOVERNMENT

The present constitution dates from 1894; a later constitutional convention, 1938, is now legally considered merely to have amended the 1894 constitution, which has now had 93 amendments. A proposed new constitution in 1967 was rejected by the electorate. The Senate consists of 60 members, and the Assembly of 150 members, both elected every 2 years. The state capital is Albany. For local government the state is divided into 62 counties, 5 of which constitute the city of New York. There were state parks and recreation areas covering 260,198 acres in 1990.

Each of the state's 62 cities is incorporated by charter, under special legislation. The government of New York City is vested in the mayor (Rudolph Giuliani), elected for 4 years, and a city council, whose president and members are elected for 4 years. The council has a President and 51 members, each elected from a district wholly within the city. The mayor appoints all the heads of departments, except the comptroller, who is elected. Each of the 5 city boroughs (Manhattan, Bronx, Brooklyn, Queens and Staten Island) has a president, elected for 4 years. Each borough is also a county bearing the same name except Manhattan borough, which, as a county, is called New York, and Brooklyn, which is Kings County.

NORTH CAROLINA

KEY HISTORICAL EVENTS

The early inhabitants were Cherokees. European settlement was attempted in 1585–87, following an exploratory visit by Sir Walter Raleigh, but this failed. Settlers from Virginia came to the shores of Albemarle Sound after 1650, and in 1663 Charles II chartered a private colony of Carolina. In 1691 the north was put under a deputy governor who ruled from Charleston in the south. The colony was formally separated into North and South Carolina in 1712. In 1729 control was taken from the private proprietors and vested in the Crown, whereupon settlement grew, and the boundary between north and south was finally fixed (1735).

After the War of Independence North Carolina became one of the original 13 states of the Union. The city of Raleigh was laid out as the new capital. Having been a plantation colony North Carolina continued to develop as a plantation state, growing tobacco with black slave labour. It was also an important source of gold before the western gold-rushes of 1848.

In 1861 at the outset of the Civil War North Carolina seceded from the Union, but General Sherman occupied the capital unopposed. A military governor was admitted in 1862, and civilian government restored with re-admission to the Union in 1868.

TERRITORY AND POPULATION

North Carolina is bounded north by Virginia, east by the Atlantic, south by South Carolina, southwest by Georgia and west by Tennessee. Land area, 48,722 sq. miles (126,180 sq. km). NORTH DAKOTA**KEY HISTORICAL EVENTS**

The original inhabitants were various groups of Plains Indians. French explorers and traders were active among them in the 18th century, often operating from French possessions in Canada. France claimed the area until 1803, when it passed to the USA as part of the Louisiana Purchase, except for the northeastern part which was held by the British until 1818.

Trading with the Indians, mainly for furs, continued until the 1860s, with American traders succeeding the French. In 1861 the Dakota Territory (North and South) was established. In 1862 the Homestead Act was passed (allowing 160 acres of public land free to any family who had worked and lived on it for 5 years) and this greatly stimulated settlement. Farming settlers came on to the wheat lands in great numbers, many of them from Canada, Norway and Germany.

Bismarck, the capital, began as a crossing-point on the Missouri and was fortified in 1872 to protect workers building the Northern Pacific Railway. There followed a gold-rush nearby, and the town became a service centre for prospectors. In 1889 North and South Dakota were admitted to the Union as separate states, and Bismarck became the Northern capital. The largest city is Fargo which was also a railway town, named after William George Fargo the express-company founder.

The population grew rapidly until 1890 and steadily until 1930 by which time it was about one-third European in parentage. Between 1930 and 1970 there was a steady population drain, increasing whenever farming was affected by the extremes of the continental climate.

OHIO

KEY HISTORICAL EVENTS

The land was inhabited by Delaware, Miami, Shawnee and Wyandot Indians. It was explored by French and British traders in the 18th century and confirmed as part of British North America in 1763. After the War of Independence it became part of the Northwest Territory of the new United States. Former American soldiers of the war came in from New England in 1788 and made the first permanent white settlement at Marietta, at the confluence of the Ohio and Muskingum rivers. In 1803 Ohio was separated from the rest of the Territory and admitted to the Union as the 17th state.

During the early 19th century there was steady immigration from Europe, mainly of Germans, Swiss, Irish and Welsh. Industrial growth began from the processing of local farm, forest and mining products; it increased rapidly with the need to supply the Union armies in the Civil War of 1861–65.

As the industrial cities grew, so immigration began again, with many whites from eastern Europe and the Balkans and blacks from the southern states looking for work in Ohio.

Cleveland, which developed rapidly as a Lake Erie port after the opening of commercial waterways to the interior and the Atlantic coast (1825, 1830 and 1855), became an iron-and-steel town during the Civil War.

OKLAHOMA

KEY HISTORICAL EVENTS

Francisco Coronado led a Spanish expedition in 1541, claiming the land for Spain. There were several Indian groups, but no strong political unit. In 1714 Juchereau de Saint Denis made the first French contact. During the 18th century French fur-

traders were active, and France and Spain struggled for control, a struggle which was resolved by the French withdrawal in 1763. France returned briefly in 1800–03, and the territory then passed to the USA as part of the Louisiana Purchase.

In 1828 the Federal government set aside the area of the present state as Indian Territory, that is, a reservation and sanctuary for Indian tribes who had been driven off their lands elsewhere by white settlement. About 70 tribes came, among whom were Creeks, Choctaws and Cherokees from the southeastern states, and Plains Indians.

In 1889 the government took back about 2.5m. acres of the Territory and opened it to white settlement. About 10,000 homesteaders gathered at the site of Oklahoma City on the Santa Fe Railway in the rush to stake their land claims. The settlers' area, and others subsequently opened to settlement, were organized as the Oklahoma Territory in 1890. In 1907 the Oklahoma and Indian Territories were combined and admitted to the Union as a state. Indian reservations were established within the state.

The economy first depended on ranching and farming, with packing stations on the railways. A mining industry grew in the 1870s attracting foreign immigration, mainly from Europe. In 1901 oil was found near Tulsa, and the industry grew rapidly.

TERRITORY AND POPULATION

Oklahoma is bounded north by Kansas, northeast by Missouri, east by Arkansas, south by Texas (the Red River forming part of the boundary) and, at the western extremity of the 'panhandle', by New Mexico and Colorado. Land area, 68,679 sq. miles (177,877 sq. km). Census population, 1 April 2000, 3,450,654, an increase of 9.7% since 1990. 67.7% of the population was urban in 1990.

The population at 5 federal censuses was:

	<i>White</i>	<i>Black</i>	<i>Indian</i>	<i>Other</i>	<i>Total</i>	<i>Per sq. mile</i>
1930	2,130,778	172,198	92,725	339	2,396,040	34.6

The US Bureau of Indian Affairs is responsible for 1,097,004 acres (1990), of which 96,839 acres were allotted to tribes. Oklahoma's Hispanic population was estimated to be 136,634 in 1999, up from 86,162 in 1990 (an increase of 58.6%).

CONSTITUTION AND GOVERNMENT

The constitution, dating from 1907, provides for amendment by initiative petition and legislative referendum; it has had 155 amendments (as of Jan. 1995).

The Legislature consists of a Senate of 48 members, who are elected for 4 years, and a House of Representatives elected for 2 years and consisting of 101 members. The Governor and Lieut.-Governor are elected for 4-year terms; the Governor can only be elected for two terms in succession. Electors are (with necessary exceptions) all citizens 18 years or older, with the usual qualifications.

The state sends 6 members to the House of Representatives.

The capital is Oklahoma City. The state has 77 counties.

RECENT ELECTIONS

In the 2000 presidential election Bush polled 744,337 votes; Gore, 474,276; Buchanan, 9,014.

CURRENT ADMINISTRATION

Governor: Frank Keating (R.), 1999–2003 (\$101,000).

Lieut.-Governor: Mary Fallin (R.) (\$62,500).

Secretary of State: Mike Hunter (R.) (\$65,000).

ECONOMY

Budget. In 1997 total state revenue was \$11,328m. Total expenditure was \$9,593m. (education, \$3,691m.; public welfare, \$1,723m.; health and hospitals, \$616m.; highways, \$806m.; police protection, \$53m.). Outstanding debt in 1997, \$3,795m.

Per capita income (1998) was \$22,801.

ENERGY AND NATURAL RESOURCES

Oil and Gas. Production 1996: crude oil, 85m. bbls.; natural gas, 1,735bn. cu. ft. In 1993 there were 122,094 oil and gas wells in production.

Water. The total area covered by water is approximately 1,224 sq. miles.

Minerals. Coal production (1993), 1,796,000m. tons. Principal minerals are: crushed stone, cement, sand and gravel, iodine, glass sand, gypsum. Other minerals are helium, clay and sand, zinc, lead, granite, tripoli, bentonite, lime and volcanic ash. Total value of domestic non-fuel minerals produced in 1998 was \$408m.

Agriculture. In 1996 the state had some 72,000 farms and ranches with a total area of 34m. acres; average size was 472 acres; average value per acre was \$494. Area harvested, 1992, 8,272,889 acres. Livestock, 1992: cattle, 4,736,594; sheep and lambs, 103,732; hogs and pigs, 260,682.

Farm income 1996: crops, \$1,126m.; livestock and products, \$2,439m. The major cash grain is winter wheat (value, 1997, \$579m.): 1,579m. bu. of wheat for grain were harvested from 5,400,000 acres. Other crops include barley, oats, rye, grain, corn, soybeans, grain sorghum, cotton, peanuts and peaches. Value of cattle and calves produced, 1990, \$3,080m.; catfish, \$1m.; racehorses, \$63m.

The Oklahoma Conservation Commission works with 91 conservation districts, universities, state and federal government agencies. The early work of the conservation districts, beginning in 1937, was limited to flood and erosion control: since 1970, they include urban areas also.

Irrigated production has increased in the Oklahoma 'panhandle'. The Ogallala aquifer is the primary source of irrigation water there and in western Oklahoma, a finite source because of its isolation from major sources of recharge. Declining groundwater levels necessitate the most effective irrigation practices.

Forestry. There are 7.5m. acres of forest, one half considered commercial. The forest products industry is concentrated in the 118 eastern counties. There are 3 forest regions: Ozark (oak, hickory); Ouachita highlands (pine, oak); Cross-Timbers (post oak, black jack oak). Southern pine is the chief commercial species, at almost 80% of saw-timber harvested annually. Replanting is essential.

OREGON

KEY HISTORICAL EVENTS

The area was divided between many Indian groups including the Chinook, Tillamook, Cayuse and Modoc. In the 18th century English and Spanish visitors tried to establish national claims, based on explorations of the 16th century. The USA also laid claim by right of discovery when an expedition entered the mouth of the Columbia River in 1792.

Oregon was disputed between Britain and the USA. An American fur company established a trading settlement at Astoria in 1811, which the British took in 1812. The Hudson Bay Company were the most active force in Oregon until the 1830s when American pioneers began to migrate westwards along the Oregon Trail. The dispute between Britain and the USA was resolved in 1846 with the boundary fixed at 49°N. lat. Oregon was organized as a Territory in 1848 but with wider boundaries; it became a state with its present boundaries in 1859.

Early settlers were mainly American. They came to farm in the Willamette Valley and to exploit the western forests. Portland developed as a port for ocean-going traffic, although it was 100 miles inland at the confluence of the Willamette and Columbia rivers. Industries followed when the railways came and the rivers were exploited for hydro-electricity. The capital of the Territory from 1851 was Salem, a mission for Indians on the Willamette river; it was confirmed as state capital in 1864. Salem became the processing centre for the farming and market-gardening Willamette Valley.

TERRITORY AND POPULATION

Oregon is bounded in the north by Washington, with the Columbia River forming most of the boundary, east by Idaho, with the Snake River forming most of the boundary, south by Nevada and California and west by the Pacific. Land area, 97,060 sq. miles (251,385 sq. km). The federal government owned (1994) 32,132,581 acres (51.73% of the state area). Census population, 1 April 2000, 3,421,399, an increase of 20.4% since 1990. 70.5% of the population was urban in 1990.

Population at 5 federal censuses was:

The US Bureau of Indian Affairs (area headquarters in Portland) administers (1994) 783,227.13 acres, of which 627,615.54 acres are held by the USA in trust for Indian tribes and 138,950.05 acres for individual Indians, and 16,661.54 acres of mineral tracts.

The largest cities according to 1998 figures are: Portland, 509,610; Eugene, 133,460; Salem (the capital), 126,635; Gresham, 83,595; Beaverton, 68,050; Hillsboro, 65,110; Medford, 58,895; Springfield, 51,700; Corvallis, 49,630; Albany, 38,925. The Legislative Assembly consists of a Senate of 30 members, elected for 4 years (half their number retiring every 2 years), and a House of 60 representatives, elected for 2 years. The Governor is elected for 4 years. The constitution reserves to the voters the rights of initiative and referendum and recall.

Oregon has 5 members in the House of Representatives.

The capital is Salem. There are 36 counties in the state.

West of the Cascade Range there is a good rainfall and almost every variety of crop common to the temperate zone is grown; east of the Range stock-raising and wheat-growing are the principal industries and irrigation is needed for row crops and fruits. In 1993 the monthly average employed in agriculture was 22,500.

PENNSYLVANIA

KEY HISTORICAL EVENTS

Pennsylvania was occupied by 4 powerful tribes in the 17th century: Delaware, Susquehannock, Shawnee and Iroquois. The first white settlers were Swedish, arriving in 1643. The British became dominant in 1664, and in 1681 William Penn, an English Quaker, was given a charter to colonize the area as a sanctuary for his fellow Quakers. Penn's ideal was peaceful co-operation with the Indians and religious toleration within the colony. Several religious groups were attracted to Pennsylvania because of this policy, including Protestant sects from Germany and France. During the 18th century, co-operation with the Indians failed as the settlers pushed into more territory and the Indians resisted.

During the War of Independence the Declaration of Independence was signed in Philadelphia, the main city. Pennsylvania became one of the original 13 states of the Union. In 1812 the state capital was moved to its current location in Harrisburg, which began as a trading post and ferry point on the Susquehanna River in the south-central part of the state. The Mason-Dixon line, the state's southern boundary, became the dividing line between free and slave states during the conflict leading to the Civil War. During the war crucial battles were fought in the state, including the battle of Gettysburg. Industrial growth was rapid after the war. Pittsburgh,

founded as a British fort in 1761 during war with the French, had become an iron-making town by 1800 and grew rapidly when canal and railway links opened in the 1830s. The American Federation of Labor was founded in Pittsburgh in 1881, by which time the city was of national importance in producing coal, iron, steel and glass.

At the beginning of the 20th century, industry attracted immigration from Italy and eastern Europe. In farming areas the early sect communities survive, notably Amish and Mennonites. (The Pennsylvania 'Dutch' are of German extraction.)

TERRITORY AND POPULATION

Pennsylvania is bounded north by New York, east by New Jersey, south by Delaware and Maryland, southwest by West Virginia, west by Ohio and northwest by Lake Erie. RHODE ISLAND

KEY HISTORICAL EVENTS

The earliest white settlement was founded by Roger Williams, an English Puritan who was expelled from Massachusetts because of his dissident religious views and his insistence on the land-rights of the Indians. At Providence he bought land from the Narragansetts and founded a colony there in 1636. A charter was granted in 1663. The colony was governed according to policies of toleration, which attracted Jewish and nonconformist settlers; later there was French Canadian settlement also.

Shipping and fishing developed strongly, especially at Newport and Providence; these two cities were twin capitals until 1900, when the capital was fixed at Providence.

Significant actions took place in Rhode Island during the War of Independence. In 1790 the state accepted the federal constitution and was admitted to the Union.

Early farming development was most successful in dairying and poultry. Early industrialization was mainly in textiles, beginning in the 1790s, and flourishing on abundant water power. Textiles dominated until the industry began to decline after the First World War. British, Irish, Polish, Italian and Portuguese workers settled in the state, working in the mills or in the shipbuilding, shipping, fishing and naval ports. The crowding of a new population into cities led to the abolition of the property qualification for the franchise in 1888.

TERRITORY AND POPULATION

Rhode Island is bounded north and east by Massachusetts, south by the Atlantic and west by Connecticut. Land area, 1,045 sq. miles (2,707 sq. km). Census population, 1 April 2000, 1,048,319, an increase of 4.5% since 1990. 86% of the population was urban in 1990.

SOUTH CAROLINA

KEY HISTORICAL EVENTS

Originally the territory of Yamasee Indians, the area attracted French and Spanish explorers in the 16th century. There were attempts at settlement on the coast, none of which lasted. Charles I of England made a land grant in 1629, but the first permanent white settlement began at Charles Town in 1670, moving to Charleston in 1680. This was a proprietorial colony including North Carolina until 1712; both passed to the Crown in 1729.

The coastlands developed as plantations worked by slave labour. In the hills there were small farming settlements and many trading posts, dealing with Indian suppliers.

After active campaigns during the War of Independence, South Carolina became one of the original states of the Union in 1788.

In 1793 the cotton gin was invented, enabling the speedy mechanical separation of seed and fibre. This made it possible to grow huge areas of cotton and meet the rapidly growing needs of new textile industries. Plantation farming spread widely, and South Carolina became hostile to the anti-slavery campaign which was strong in northern states. The state first attempted to secede from the Union in 1847, but was not supported by other southern states until 1860, when secession led to civil war.

At that time the population was about 703,000, of whom 413,000 were black. During the reconstruction periods there was some political power for black citizens, but control was back in white hands by 1876. The constitution was amended in 1895 to disenfranchise most black voters, and they remained with hardly any voice in government until the Civil Rights movement of the 1960s. Columbia became the capital in 1786.

SOUTH DAKOTA

KEY HISTORICAL EVENTS

The area was part of the hunting grounds of nomadic Dakota (Sioux) Indians. French explorers visited the site of Fort Pierre in 1742–43, and claimed the area for France. In 1763 the claim fell and, together with French claims to all land west of the Mississippi, passed to Spain. Spain held the Dakotas until defeated by France in the Napoleonic Wars, when France regained the area and sold it to the USA as part of the Louisiana Purchase in 1803.

Fur-traders were active, but there was no settlement until Fort Randall was founded on the Missouri river in 1856. In 1861 North and South Dakota were organized as the Dakota Territory, and the Homestead Act of 1862 stimulated settlement, mainly in the southeast until there was a gold-rush in the Black Hills of the west in 1875–76. Colonization developed as farming communities in the east, miners and ranchers in the west. Livestock farming predominated, attracting European settlers from Scandinavia, Germany and Russia.

In 1889 the North and South were separated and admitted to the Union as states. The capital of South Dakota is Pierre, founded as a railroad in 1880, chosen as a temporary capital and confirmed as permanent capital in 1904. It faces Fort Pierre, the former centre of the fur trade, across the Missouri river. During the 20th century there have been important schemes to exploit the Missouri for power and irrigation.

TENNESSEE

KEY HISTORICAL EVENTS

Bordered on the west by the Mississippi, Tennessee was part of an area inhabited by Cherokee, French, Spanish and British explorers penetrated the area up the Mississippi and traded with the Cherokee in the late 16th and 17th centuries. French claims were abandoned in 1763, colonists from the British colonies of Virginia and Carolina then began to cross the Appalachians westwards, but there was no organized Territory until after the War of Independence. In 1784 there was a short-lived, independent state called Franklin. In 1790 the South West Territory (including Tennessee) was formed, and Tennessee entered the Union as a state in 1796.

The state was active in the war against Britain in 1812. After the American victory, colonization increased and pressure for land mounted. The Cherokee were forcibly removed during the 1830s and taken to Oklahoma, a journey on which many died.

Tennessee was a slave state and seceded from the Union in 1861, although eastern Tennessee was against secession. There were important battles at Shiloh, Chattanooga, Stone River and Nashville. In 1866 Tennessee was re-admitted to the Union.

Nashville, the capital since 1843, Memphis, Knoxville, and Chattanooga all developed as river towns, Memphis becoming an important cotton and timber port. Growth was greatly accelerated by the creation of the Tennessee Valley Authority in the 1930s, producing power for a manufacturing economy. Industry increased to the extent that, by 1970, the normal southern pattern of emigration and population loss had been reversed.

TEXAS

KEY HISTORICAL EVENTS

A number of Indian tribes occupied the area before French and Spanish explorers arrived in the 16th century. In 1685 La Salle established a colony at Fort St Louis, but Texas was confirmed as Spanish in 1713. Spanish missions increased during the 18th century with San Antonio (1718) as their headquarters.

In 1820 a Virginian colonist, Moses Austin, obtained permission to begin a settlement in Texas. In 1821 the Spanish empire in the Americas came to an end,

UNITED STATES OF AMERICA

and Texas, together with Coahuila, formed a state of the newly independent Mexico. The Mexicans agreed to the Austin venture, and settlers of British and American descent came in.

The settlers became discontented with Mexican government and declared their independence in 1836. Warfare, including the siege of the Alamo fort, ended with the foundation of the independent Republic of Texas, which lasted until 1845. During this period the Texas Rangers were organized as a policing force and border patrol. Texas was annexed to the Union in Dec. 1845, as the Federal government feared its vulnerability to Mexican occupation. This led to war between Mexico and the USA from 1845 to 1848. In 1861 Texas left the Union and joined the southern states in the Civil War, being re-admitted in 1869. Ranching and cotton-growing were the main activities before the discovery of oil in 1901.

TERRITORY AND POPULATION

Texas is bounded north by Oklahoma, northeast by Arkansas, east by Louisiana, southeast by the Gulf of Mexico, south by Mexico and west by New Mexico. Land area, 261,914 sq. miles (678,358 sq. km). UTAH

KEY HISTORICAL EVENTS

Spanish Franciscan missionaries explored the area in 1776, finding Shoshoni Indians. Spain laid claim to Utah and designated it part of Spanish Mexico. As such it passed into the hands of the Mexican Republic when Mexico rebelled against Spain and gained independence in 1821.

In 1848, at the conclusion of war between the USA and Mexico, the USA received Utah along with other southwestern territory. Settlers had already arrived in 1847 when the Mormons (the Church of Jesus Christ of Latter-day Saints) arrived, having been driven on by local hostility in Ohio, Missouri and Illinois. Led by Brigham Young, they entered the Great Salt Valley and colonized it. In 1849 they applied for statehood but were refused. In 1850 Utah and Nevada were joined as one Territory. The Mormon community continued to ask for statehood but this was only granted in 1896, after they had renounced polygamy and disbanded their People's Party.

Mining, especially of copper, and livestock farming were the base of the economy. Settlement had to adapt to desert conditions, and the main centres of population were in the narrow belt between the Wasatch Mountains and the Great Salt Lake. Salt Lake City, the capital, was founded in 1847 and laid out according to Joseph Smith's plan for the city of Zion. It was the centre of the Mormons' provisional 'State of Deseret' and Territorial capital from 1856 until 1896, except briefly in 1858 when federal forces occupied it during conflict between territorial and Union governments.

Census population, 1 April 2000, 2,233,169 (29.6% urban), an increase of 29.6% since 1990. 87% of the population was urban in 1990.

VERMONT

KEY HISTORICAL EVENTS

The original Indian hunting grounds of the Green Mountains and lakes was explored by the Frenchman Samuel de Champlain in 1609 who reached Lake Champlain on the northwest border. The first attempt at permanent settlement was also French, on Isle la Motte in 1666. In 1763 the British gained the area from the French by the Treaty of Paris. The Treaty, which also brought peace with the Indian allies of the French, opened the way for settlement, but in a mountain state transport was slow and difficult. Montpelier, the state capital from 1805, was chartered as a township site in 1781 to command the main pass through the Green Mountains.

During the War of Independence Vermont declared itself an independent state, to avoid being taken over by New Hampshire and New York. In 1791 it became the 14th state of the Union.

Most early settlers were New Englanders of British and Protestant descent. After 1812 a granite-quarrying industry grew around the town of Barre, attracting immigrant workers from Italy and Scandinavia. French Canadians also settled in Winooski. When textile and engineering industries developed in the 19th century these brought more European workers.

Vermont saw the only Civil War action north of Pennsylvania, when a Confederate raiding party attacked from Canada in 1864.

During the 20th century the textile and engineering industries have declined but paper and lumber industries flourish. Settlement is still mainly rural or in small towns, and farming is pastoral.

VIRGINIA

KEY HISTORICAL EVENTS

In 1607 a British colony was founded at Jamestown, on a peninsula in the James River, to grow tobacco. The area was marshy and unhealthy but the colony survived and in 1619 introduced a form of representative government. The tobacco plantations expanded and African slaves were imported. Jamestown was later abandoned, but tobacco-growing continued and spread through the eastern part of the territory.

In 1624 control of the colony passed from the Virginia Company of London to the Crown. Growth was rapid during the 17th and 18th centuries. The movement for American independence was strong in Virginia; George Washington and Thomas Jefferson were both Virginians, and crucial battles of the War of Independence were fought there.

When the Union was formed, Virginia became one of the original states, but with reservations regarding the constitution because of its attachment to slave-owning. In 1831 there was a slave rebellion. The tobacco plantations began to decline, and plantation owners turned to the breeding of slaves. While the eastern plantation lands seceded from the Union in 1861, the small farmers and miners of the western hills refused to secede and remained in the Union as West Virginia.

Richmond, the capital, became the capital of the Confederacy. Much of the Civil War's decisive conflict took place in Virginia, with considerable damage to the economy. After the war the position of the black population was little improved. Blacks remained without political or civil rights until the 1960s.

WASHINGTON

KEY HISTORICAL EVENTS

The strongest Indian tribes in the 18th century were Chinook, Nez Percé, Salish and Yakima. The area was designated by European colonizers as part of the Oregon Country. Between 1775 and 1800 it had been claimed by explorers for Spain, Britain and the USA; the dispute between the two latter nations was not settled until 1846.

The first small white settlements were Indian missions and fur-trading posts. In the 1840s American settlers began to push westwards along the Oregon Trail, making a speedy solution of the dispute with Britain necessary. When this was achieved the whole area was organized as the Oregon Territory in 1848, and Washington was made a separate Territory in 1853.

Apart from trapping and fishing, the important industry was logging, mainly to supply building timbers to the new settlements of California. After 1870 the westward extension of railways helped to stimulate settlement. Statehood was granted in 1889. The early population was composed mainly of Americans from neighbouring states to the east, and Canadians. Scandinavian immigrants followed. Seattle, the chief city, was laid out in 1853 as a saw-milling town and named after the Indian chief who had ceded the land and befriended the settlers. It grew as a port during the Alaskan and Yukon gold-rushes of the 1890s. The economy thrived on exploiting the Columbia River for hydro-electric power.

WEST VIRGINIA

KEY HISTORICAL EVENTS

In 1861 the state of Virginia seceded from the Union over the issue of slave-owning. The 40 western counties of the state were composed of hilly country, settled by miners and small farmers who were not slave-owners, and these counties ratified an ordinance providing for the creation of a new state that same year. On 20 June 1863 West Virginia became the 35th state of the Union.

The capital, Charleston, was an 18th-century fortified post on the early westward migration routes across the Appalachians. In 1795 local brine wells were tapped and the city grew as a salt town. Coal, oil, natural gas and a variety of salt brines were all found in due course. Huntington, the next largest town, developed as a railway terminus serving the same industrial area, and also providing transport on the Ohio river. Wheeling, the original state capital, was a well established, cosmopolitan city when it hosted the statehood meetings in 1861, located on the major transportation routes of the Ohio River, Baltimore and Ohio Railroad and the National Road.

UNITED STATES OF AMERICA

Three-quarters of the state is forest and settlement has been concentrated in the mineral-bearing Kanawha valley, along the Ohio river and in the industrial Monongahela valley of the north. More than half of the population is still classified as rural. The traditional small firms and small hill-mines, however, support few, and the majority of rural dwellers commute to industrial employment.

TERRITORY AND POPULATION

West Virginia is bounded in the north by Pennsylvania and Maryland, east and south by Virginia, southwest by the Big Sandy River (forming the boundary with Kentucky) and west by the Ohio River (forming the boundary with Ohio). Total area, 24,232 sq. miles (62,761 sq. km). Census population, 1 April 2000, 1,808,344, an increase of 0.8% since 1990. 36.1% of the population was urban in 1990.

Population in 6 federal census years was:

WISCONSIN

KEY HISTORICAL EVENTS

The French were the first European explorers of the territory; Jean Nicolet landed at Green Bay in 1634, a mission was founded in 1671 and a permanent settlement at Green Bay followed. In 1763 French claims were surrendered to Britain. In 1783 Britain ceded them to the USA, which designated the Northwest Territory, of which Wisconsin was part. In 1836 a separate Territory of Wisconsin was organized, including the present Iowa, Minnesota and parts of the Dakotas.

Territorial organization was a great stimulus to settlement. In 1836 James Duane Doty founded the town site of Madison and successfully pressed its claim to be the capital of the Territory even before it was inhabited. In 1848 Wisconsin became a state, with its present boundaries.

The city of Milwaukee was founded, on Lake Michigan, when Indian tribes gave up their claims to the land in 1831–33. It grew rapidly as a port and industrial town, attracting Germans in the 1840s, Poles and Italians 50 years later. The Lake Michigan shore was developed as an industrial area; the rest of the south proved suitable for dairy farming; the north, mainly forests and lakes, has remained sparsely settled except for tourist bases.

There is a Menominee Indian reservation in the northeast, where many of the 29,000 remaining Indians live. Since the Second World War there has been black immigration from the southern states to the industrial lake-shore cities.

Census population, 1 April 2000, 5,363,675, an increase of 9.6% since 1990. 65.7% of the population was urban in 1990.

WYOMING

KEY HISTORICAL EVENTS

The territory was inhabited by Plains Indians (Arapahoes, Sioux and Cheyenne) in the early 19th century. There was some trading between them and white Americans, but very little white settlement. In the 1840s the great western migration routes, the Oregon and the Overland Trails, ran through the territory, Wyoming offering mountain passes accessible to wagons. Once migration became a steady flow it was necessary to protect the route from Indian attack, and forts were built.

In 1867 coal was discovered. In 1868 Wyoming was organized as a separate Territory, and in 1869 the Sioux and Arapaho were confined to reservations. At the same time the route of the Union Pacific Railway was laid out, and working settlements and railway towns grew up in southern Wyoming. Settlement of the north was delayed until after the final defeat of hostile Indians in 1876.

The economy of the settlements at first depended on ranching. Cheyenne had been made Territorial capital in 1869, and also functioned as a railway town moving cattle. Casper, on the site of a fort on the Pony Express route, was also a railway town on the Chicago and North Western. Laramie started as a Union Pacific construction workers' shanty town in 1868. In 1890 oil was discovered at Casper, and Wyoming became a state in the same year. Subsequently, mineral extraction became the leading industry, as natural gas, uranium, bentonite and trona were exploited as well as oil and coal.

TERRITORY AND POPULATION

Wyoming is bounded north by Montana, east by South Dakota and Nebraska, south by Colorado, southwest by Utah and west by Idaho. Land area, 97,105 sq. miles (251,501 sq. km). The federal government in 1986 owned 49,838 sq. miles (50·9% of the total area of the state). The Federal Bureau of Land Management administers 17,546,188 acres.

Census population, 1 April 2000, 493,782, an increase of 8·9% since 1990. 65% of the population was urban in 1990.

OUTLYING TERRITORIES

GUAM

KEY HISTORICAL EVENTS

Magellan is said to have discovered the island in 1521; it was ceded by Spain to the USA by the Treaty of Paris (10 Dec. 1898). The island was captured by the Japanese on 10 Dec. 1941, and retaken by American forces from 21 July 1944. Guam is of great strategic importance; substantial numbers of naval and air force personnel occupy about one-third of the usable land.

TERRITORY AND POPULATION

Guam is the largest and most southern island of the Marianas Archipelago, in 13° 26' N. lat., 144° 43' E. long. Total area, 209 sq. miles (541 sq. km). Agaña, the seat of government, is about 8 miles from the anchorage in Apra Harbor. The census on 1 April 1990 showed a population of 133,152, an increase of 27,173 since 1980 (62,207 female). Estimate, 1996, 157,000; density, 290 per sq. km. In 1995 an estimated 61.7% of the population lived in rural areas. In 1990 those of Guamanian ancestry numbered 63,504. The Malay strain is predominant. The native language is Chamorro; English is the official language and is taught in all schools.

SOCIAL STATISTICS

Births, 1997, 4,309; deaths, 615. Birth rate, 1997, 29.5 per 1,000 population; death rate, 4.2 per 1,000 population; infant mortality rate, 8.1 per 1,000 live births. Life expectancy, 1990–95, was 72.2 years for males and 76.0 years for females. Fertility rate, 1990–95, 3.4 births per woman.

CLIMATE

Tropical maritime, with little difference in temperatures over the year. Rainfall is copious at all seasons, but is greatest from July to Oct. Agaña, Jan. 81°F (27.2°C), July 81°F (27.2°C). Annual rainfall 93" (2,325 mm).

CONSTITUTION AND GOVERNMENT

Guam's constitutional status is that of an 'unincorporated territory' of the USA. Entry of US citizens is unrestricted; foreign nationals are subject to normal regulations. In 1949–50 the President transferred the administration of the island from the Navy Department (who held it from 1899) to the Interior Department. The transfer conferred full citizenship on the Guamanians, who had previously been 'nationals' of the USA. There was a referendum on status on 30 Jan. 1982. 38% of eligible voters voted; 48.5% of those favoured Commonwealth status.

The Governor and his staff constitute the executive arm of the government. The legislature is a 21-member Senate; its powers are similar to those of an American state legislature.

RECENT ELECTIONS

At the election of 7 Nov. 2000 for the Guam Legislature the Republican Party won 8 seats and the Democrat Party won 7. Guam returns 1 non-voting delegate to the House of Representatives. In gubernatorial elections on 3 Nov. 1998, incumbent Carl Gutierrez (Dem.) won with 53.2% of the vote against Republican Joseph Ada.

COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

KEY HISTORICAL EVENTS

In 1889 Spain ceded Guam (largest and southernmost of the Marianas Islands) to the USA and sold the rest to Germany. Occupied by Japan in 1914, the islands were administered by Japan under a League of Nations mandate until occupied by US forces in Aug. 1944. In 1947 they became part of the US-administered Trust Territory of the Pacific Islands. On 17 June 1975 the electorate adopted a covenant to establish a Commonwealth in association with the USA; this was approved by the US government in April 1976 and came into force on 1 Jan. 1978. In Nov. 1986 the islanders were granted US citizenship. The UN terminated the Trusteeship status on 22 Dec. 1990.

TERRITORY AND POPULATION

The Northern Marianas form a single chain of 16 mountainous islands extending north of Guam for about 560 km, with a total area of 5,050 sq. km (1,950 sq. miles) of which 464 sq. km (179 sq. miles) are dry land, and with a population (1990 census) of 43,345 (urban, 12,151; female, 20,543). 16,752 persons were born in the Islands. AMERICAN SAMOA

KEY HISTORICAL EVENTS

The Samoan Islands were first visited by Europeans in the 18th century; the first recorded visit was in 1722. On 14 July 1889 a treaty between the USA, Germany and Great Britain proclaimed the Samoan islands neutral territory, under a 4-power government consisting of the 3 treaty powers and the local native government. By the Tripartite Treaty of 7 Nov. 1899, ratified 19 Feb. 1900, Great Britain and Germany renounced in favour of the USA all rights over the islands of the Samoan

group east of 171° long. west of Greenwich, the islands to the west of that meridian being assigned to Germany (now the independent state of Samoa). The islands of Tutuila and Aunu'u were ceded to the USA by their High Chiefs on 17 April 1900, and the islands of the Manu'a group on 16 July 1904. Congress accepted the islands under a Joint Resolution approved 20 Feb. 1929. Swain's Island, 210 miles north of the Samoan Islands, was annexed in 1925 and is administered as an integral part of American Samoa.

TERRITORY AND POPULATION

The islands (Tutuila, Aunu'u, Ta'u, Olosega, Ofu and Rose) are approximately 650 miles east-northeast of the Fiji Islands. The total area is 1,511 sq. km (583 sq. miles), of which 200 sq. km (77 sq. miles) are dry land; population (1990 census), 46,773, nearly all Polynesians or part-Polynesians, of whom 25,573 were born in American Samoa (female, 22,750); estimate (July 1996), 59,566, giving a density of 298 per sq. km (774 per sq. mile). The estimated population for 2000 was 65,000.

In 1995 an estimated 50.3% of the population lived in urban areas. The capital is Pago Pago, which had a population of 14,000 in 1999. The island's 3 Districts are Eastern (population, 1980, 17,311), Western (13,227) and Manu'a (1,732). There is also Swain's Island, with an area of 1.9 sq. miles and 100 inhabitants (1994), which lies 210 miles to the northwest. Rose Island (uninhabited) is 0.4 sq. mile in area. In 1990 some 85,000 American Samoans lived in the USA.

CONSTITUTION AND GOVERNMENT

American Samoa is constitutionally an unorganized, unincorporated territory of the USA administered under the Department of the Interior. Its indigenous inhabitants are US nationals and are classified locally as citizens of American Samoa with certain privileges under local laws not granted to non-indigenous persons. Polynesian customs (not inconsistent with US laws) are respected.

Fagatogo is the seat of the government.

The islands are organized in 15 counties grouped in 3 districts; these counties and districts correspond to the traditional political units. On 25 Feb. 1948 a bicameral legislature was established, at the request of the Samoans, to have advisory legislative functions. With the adoption of the Constitution of 22 April 1960, and the revised Constitution of 1967, the legislature was vested with limited law-making authority. The lower house, or House of Representatives, is composed of 20 members elected by universal adult suffrage and 1 non-voting member for Swain's Island. The upper house, or Senate, is comprised of 18 members elected, in the traditional Samoan manner, in meetings of the chiefs. The Governor and Lieut.-Governor have been popularly elected since 1978.

VIRGIN ISLANDS OF THE UNITED STATES

KEY HISTORICAL EVENTS

The Virgin Islands of the United States, formerly known as the Danish West Indies, were named and claimed for Spain by Columbus in 1493. They were later settled by Dutch and English planters, invaded by France in the mid-17th century and abandoned by the French c. 1700, by which time Danish influence had been established. St Croix was held by the Knights of Malta between two periods of French rule.

The Virgin Islands were purchased by the United States from Denmark for \$25m. in a treaty ratified by both nations and proclaimed on 31 March 1917. Their value was wholly strategic, inasmuch as they commanded the Anegada Passage from the Atlantic Ocean to the Caribbean Sea and the approach to the Panama Canal. Although the inhabitants were made US citizens in 1927, the islands are, constitutionally, an 'unincorporated territory'.

TERRITORY AND POPULATION

The Virgin Islands group, lying about 40 miles due east of Puerto Rico, comprises the islands of St Thomas (31 sq. miles), St Croix (83 sq. miles), St John (20 sq. miles) and 65 small islets or cays, mostly uninhabited. The total area is 1,910 sq. km (738 sq. miles), of which 346 sq. km (134 sq. miles) are dry land.

The population, according to the census of 1 April 1990, was 101,809, a decrease of 8,991 since 1985 (52,599 females); population estimate, 1996, 97,120, giving a density of 725 per sq. mile. An estimated 54.9% of the population were rural in 1995. The most recent census took place in April 2000.

Population (1990 census) of St Croix, 50,139; St Thomas, 48,166; St John, 3,504. About 45% (1990) were native-born, 29% from other Caribbean islands, 13% from mainland USA and 5% from Puerto Rico. St Croix has over 40% of Puerto Rican origin or extraction, Spanish speaking.

The capital and only city, Charlotte Amalie, on St Thomas, had a population (1999 estimate) of 12,000. There are two towns on St Croix: Christiansted (2,555 in 1990) and Frederiksted (1,064 in 1990).

SOCIAL STATISTICS

1997 births, 2,017; deaths, 620. Rates, 1997 (per 1,000 population); birth, 17.6; death, 5.4; infant mortality, 12.9 per 1,000 live births.

CLIMATE

Average temperatures vary from 77°F to 82°F throughout the year; humidity is low. Average annual rainfall, about 45". The islands lie in the hurricane belt; tropical storms with heavy rainfall can occur in late summer.

CONSTITUTION AND GOVERNMENT

The Organic Act of 22 July 1954 gives the US Department of the Interior full jurisdiction; some limited legislative powers are given to a single-chambered legislature, composed of 15 senators elected for 2 years representing the two legislative districts of St Croix and St Thomas-St John.

The Governor is elected by the residents. Since 1954 there have been four attempts to redraft the Constitution, to provide for greater autonomy. Each has been rejected by the electorate. The latest was defeated in a referendum in Nov. 1981, 50% of the electorate participating.

For administration, there are 14 executive departments, 13 of which are under commissioners and the other, the Department of Justice, under an Attorney-General. The US Department of the Interior appoints a Federal Comptroller of government revenue and expenditure.

The franchise is vested in residents who are citizens of the United States, 18 years of age or over. In 1986 there were 34,183 voters, of whom 26,377 participated in the local elections that year. They do not participate in the US presidential election but they have a non-voting representative in Congress.

The capital is Charlotte Amalie, on St Thomas Island.

RECENT ELECTIONS

In the elections for governor held on 3 Nov. 1998 Charles Turnbull II (Democrat) gained 58.9% of the votes against Roy Schneider (Independent Citizens' Movement). In the Senate election on the same day the Democrats won 6 seats, non-partisans also 6, Republicans 2 and the Independent Citizens' Movement 1.

KEY HISTORICAL EVENTS

Uruguay was the last colony settled by Spain in the Americas. Part of the Spanish viceroyalty of Rio de la Plata until revolutionaries expelled the Spanish in 1811 and subsequently a province of Brazil, Uruguay declared independence on 25 Aug. 1825. Conflict between two political parties, the *blancos* (conservatives) and the *colorados* (liberals), led, in 1865–70, to the War of the Triple Alliance. In 1903 peace and prosperity were restored under President José Batlle y Ordóñez. Since 1904 Uruguay has been unique in her constitutional innovations, all designed to protect her from dictatorship. A favoured device was the collegiate system of government, in which the two largest political parties were represented.

The early part of the 20th century saw the development of a welfare state in Uruguay which encouraged extensive immigration. In 1919 a new constitution was adopted providing for a *colegiado*—a plural executive based on the Swiss pattern. However, the system was abolished in 1933 and replaced by presidential government, with quadrennial elections. From 1951 to 1966 a collective form of leadership again replaced the presidency. During the 1960s, following a series of strikes and riots, the Army became increasingly influential, repressive measures were adopted and presidential government was restored in 1967. The Tupamaro, Marxist urban guerrillas, sought violent revolution but were finally defeated by the Army in 1972. The return to civilian rule came on 12 Feb. 1985.

CONSTITUTION AND GOVERNMENT

Congress consists of a *Senate* of 31 members and a *Chamber of Deputies* of 99 members, both elected by proportional representation for 5-year terms. The electoral system provides that the successful presidential candidate be a member of the party which gains a parliamentary majority. Electors vote for deputies on a first-past-the-post system, and simultaneously vote for a presidential candidate of the same party. The winners of the second vote are credited with the number of votes obtained by their party in the parliamentary elections. Referendums may be called at the instigation of 10,000 signatories. A referendum was held on 8 Dec. 1996 to prohibit parties from presenting more than 1 candidate in presidential elections, and to provide for 2 rounds of voting if no candidate gained an absolute majority in the first round. 50.2% of votes cast were in favour.

National Anthem. 'Orientales, la patria o la tumba' ('Easterners, the fatherland or the tomb'); words by F. Acuña de Figueroa, tune by F. J. Deballi.

KEY HISTORICAL EVENTS

Vanuatu occupies the group of islands formerly known as the New Hebrides, in the southwestern Pacific Ocean. Captain Bligh and his companions, cast adrift by the *Bounty* mutineers, sailed through part of the island group in 1789. Sandalwood merchants and European missionaries came to the islands in the mid-19th century and were then followed by cotton planters—mostly French and British—in 1868. In response to Australian

calls to annexe the islands, Britain and France agreed on joint supervision. Joint sovereignty was held over the indigenous Melanesia people but each nation retained responsibility for its own nationals according to a protocol of 1914. The island group escaped Japanese invasion during the Second World War and became an Allied base. On 30 July 1980 New Hebrides became an independent nation under the name of Vanuatu, meaning 'Our Land Forever'.

TERRITORY AND POPULATION

Vanuatu comprises 80 islands, which lie roughly 800 km west of the Fiji Islands and 400 km northeast of New Caledonia. The estimated land area is 4,706 sq. miles (12,190 sq. km). They also claim Matthew and Hunter islands. 67 islands were inhabited in 1990. Population at the census (1989), 142,944. Estimated population in 1997, 181,400, giving a density of 15 per sq. km.

The UN gives a projected population for 2010 of 245,000.

In 1998, 80.5% of the population lived in rural areas. Vila (the capital) has a population of 26,000 (1999 estimate), and Luganville 10,000.

VATICAN CITY STATE

Population estimate, 2000: 900

Stato della Città del Vaticano

KEY HISTORICAL EVENTS

For many centuries the Popes bore temporal sway over a territory stretching across mid-Italy. In the 19th century the Papal States were incorporated into the Italian Kingdom. On 11 Feb. 1929 a treaty between the Italian Government and the Vatican recognized the sovereignty of the Holy See in the city of the Vatican.

TERRITORY AND POPULATION

The area of Vatican City is 44 ha (108.7 acres). It includes the Piazza di San Pietro (St Peter's Square), which is to remain normally open to the public and subject to the powers of the Italian police. It has its own railway station (for freight only), postal facilities, coins and radio. Twelve buildings in and outside Rome enjoy extra-territorial rights, including the Basilicas of St John Lateran, St Mary Major and St Paul without the Walls, the Pope's summer villa at Castel Gandolfo and a further Vatican radio station on Italian soil. *Radio Vaticana* broadcasts an extensive service in 34 languages from the transmitters in Vatican City and in Italy. The Holy See and the Vatican are not synonymous—the Holy See, referring to the primacy of the Pope, is located in Vatican City.

Vatican City has about 900 inhabitants.

CONSTITUTION AND GOVERNMENT

Vatican City State is governed by a Commission appointed by the Pope. The reason for its existence is to provide an extra-territorial, independent base for the Holy See, the government of the Roman Catholic Church. The Pope exercises sovereignty and has absolute legislative, executive and judicial powers. The judicial power is delegated to a tribunal in the first instance, to the Sacred Roman Rota in appeal and to the Supreme Tribunal of the Signature in final appeal.

The Pope is elected by the College of Cardinals, meeting in secret conclave. The election is by scrutiny and requires a two-thirds majority.

CURRENT ADMINISTRATION

Supreme Pontiff: **John Paul II** (Karol Wojtyła), born at Wadowice near Kraków, Poland, 18 May 1920. Archbishop of Kraków 1964–78, created Cardinal in 1967; elected Pope 16 Oct. 1978, inaugurated 22 Oct. 1978.

Pope John Paul II was the first non-Italian to be elected since Pope Adrian VI (a Dutchman) in 1522.

Secretary of State: Cardinal Angelo Sodano.

Secretary for Relations with Other States: Jean-Louis Tauran.

ECONOMY

Performance. Real GDP growth was 3.0% in 1995 (2.2% in 1994 but –1.2% in 1993).

Budget. Revenues in 1994 were US\$175.5m. and expenditures US\$175m.

ROMAN CATHOLIC CHURCH

The Roman Pontiff is in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity. The Pope is the Vicar of Christ and the Successor of St Peter, who exercises universal governance over the Church. He is also the sovereign ruler of Vatican City State. He has for advisers the Sacred College of Cardinals, consisting in Feb. 2001 of 183 Cardinals from 68 countries (159

created by Pope John Paul II, including 44 in Jan. 2001), of whom 135 are cardinal electors—those under the age of 80 who may enter into conclave to elect a new Pope. For the first time more than half of the cardinal electors are from outside of Europe. Cardinals, addressed by the title of ‘Eminence’, are appointed by the Pope from senior ecclesiastics who are either the bishops of important Sees or the heads of departments at the Roman Curia. In addition to the College of Cardinals, there is a Synod of Bishops, created by Pope Paul VI and formally instituted on 15 Sept. 1965. This consists of the Patriarchs and certain Metropolitans of the Catholic Church of Oriental Rite, of elected representatives of the national episcopal conferences and religious orders of the world, of the Cardinals in charge of the Roman Congregations and of other persons nominated by the Pope. The Synod meets in both general (global) and special (regional) assemblies. General Synods are scheduled to take place every 3 years. The last was held in 1999 and was a Special Assembly for Europe. The next General Assembly is scheduled for Oct. 2001 on the theme of the mission of the local bishop in the universal church.

The central administration of the Roman Catholic Church is carried out by a number of permanent organisms called Congregations, Council, Commissions and Offices. The Congregations are composed of a number of Cardinals and diocesan bishops (both appointed for 5-year periods), with Consultors and Officials. Besides the Secretariat of State (which has two sections, including the Section for Relations with States) there are now 9 Congregations, viz.: Doctrine, Oriental Churches, Bishops, the Sacraments and Divine Worship, Clergy, Religious, Catholic Education, Evangelization of the Peoples and Causes of the Saints. Pontifical Councils have replaced some of the previously designated Secretariats and Prefectures and now represent the Laity, Christian Unity, the Family, Justice and Peace, Cor Unum, Migrants, Health Care Workers, Interpretation of Legislative Texts, Inter-Religious Dialogue, Culture, Preserving the Patrimony of Art and History, and a Commission, for Latin America. There are also various Offices. There are three academies: the Pontifical Academy for Sciences, the Pontifical Academy for Life and the Pontifical Academy for Social Sciences, the latter two instituted by Pope John Paul II.

DIPLOMATIC REPRESENTATIVES

In its diplomatic relations with foreign countries the Holy See is represented by the Secretariat of State and the Second Section (Relations with States) of the Council for Public Affairs of the Church. It maintains permanent observers to the UN.

KEY HISTORICAL EVENTS

Columbus sighted Venezuela in 1498 and it was visited by Alonso de Ojeda and Amerigo Vespucci in 1499 who named it Venezuela (Little Venice). It was part of the Spanish colony of New Granada until 1821 when it became independent, at first in union with Colombia and then as an independent republic from 1830. Up to 1945 the country was governed mainly by dictators. In 1945 a three-day revolt against the reactionary government of Gen. Isaías Medina led to constitutional and economic

reforms. In 1961 a new constitution provided for a presidential election every five years, a national congress, and state and municipal legislative assemblies. Twenty political parties participated in the 1983 elections. By now the economy was in crisis and corruption linked to drug trafficking was widespread. In Feb. 1992 there were two abortive coups. A state of emergency was declared. In Dec. 1993 Dr Rafael Caldera Rodríguez's election as president reflected disenchantment with the established political parties. He took office in the early stages of a banking crisis which cost 15% of GDP to resolve. Fiscal tightening backed by the IMF brought rapid recovery. Hugo Chávez Frías, who succeeded as president in Feb. 1999, continued with economic reforms and amended the constitution to increase presidential powers.

In Dec. 1999 the north coast of Venezuela was hit by devastating floods and mudslides which resulted in approximately 30,000 deaths.

TERRITORY AND POPULATION

Venezuela is bounded to the north by the Caribbean with a 2,813 km coastline, east by the Atlantic and Guyana, south by Brazil, and southwest and west by Colombia. The area is 916,490 sq. km (353,857 sq. miles) including 72 islands in the Caribbean. Population (1990) census, 19,455,429 (84% urban; estimate, 86·8% in 1998). Estimate (1997) 21·8m.; density, 23·9 per sq. km.

The UN gives a projected population for 2010 of 28·72m.

The official language is Spanish. English is taught as a mandatory second language in high schools.

The climate ranges from warm temperate to tropical. Temperatures vary little throughout the year and rainfall is plentiful. The dry season is from Dec. to April. The hottest months are July and August. Caracas, Jan. 65°F (18.3°C), July 69°F (20.6°C). Annual rainfall 32" (833 mm). Ciudad Bolívar, Jan. 79°F (26.1°C), July 81°F (27.2°C). CONSTITUTION AND GOVERNMENT

Venezuela is a federal republic, comprising 34 federal dependencies, 23 states and 1 federal district. Executive power is vested in the President. The ministers, who together constitute the Council of Ministers, are appointed by the President and head various executive departments. There are 17 ministries and 7 officials who also have the rank of Minister of State.

90% of votes cast in a referendum on 25 April 1999 were in favour of the plan to rewrite the constitution proposed by President Chávez. As a result, on 25 July the public was to elect a constitutional assembly to write a new constitution, which was subsequently to be voted on in a national referendum. In Aug. 1999 the constitutional assembly declared a national state of emergency. It subsequently suspended the Supreme Court, turned the elected Congress into little more than a sub-committee, stripping it of all its powers, and assumed many of the responsibilities of government. In Dec. 1999 the President's plan to redraft the constitution was approved by over 70% of voters in a referendum. As a result presidents are able to serve 2 consecutive 6-year-terms instead of terms of 5 years which cannot be consecutive, the senate is abolished and greater powers will be given to the state and the armed forces. President Chávez has effectively taken over both the executive and the judiciary. The constitution provides for procedures by which the President may reject bills passed by Congress, as well as provisions by which Congress may override such Presidential veto acts.

National Anthem. 'Gloria al bravo pueblo' ('Glory to the brave people'); words by Vicente Salías, tune by Juan Landaeta.

The assembly excluded the Supreme Court and the national Judicial Council from a commission charged with reorganizing the judiciary. President Chávez declared the assembly the supreme power in Venezuela.

The court system is plagued by chronic corruption and an astounding case backlog. Only about 9,700 of the country's 23,000 prisoners in 1999 had actually been convicted. In Oct. 1999 over 100 judges accused of corruption were suspended.

KEY HISTORICAL EVENTS

By the end of the 15th century, the Vietnamese had conquered most of the Kingdom of Champa (now Vietnam's central area) and by the end of the 18th century had acquired Cochinchina (now its southern area). At the end of the 18th century, France helped to establish the Emperor Gia-Long as ruler of a unified Vietnam. Cambodia had become a French protectorate in 1863 and in 1899, after the extension of French protection to Laos in 1893, the Indo Chinese Union was proclaimed.

In 1940 Vietnam was occupied by the Japanese. In Aug. 1945 they allowed the Vietminh movement to seize power, dethrone the Emperor and establish a republic known as Vietnam. On 6 March 1946 France recognized 'the Democratic Republic of Vietnam' as a 'Free State within the Indo-Chinese Federation'. On 19 Dec. Vietminh forces made a surprise attack on Hanoi, the signal for nearly eight years of hostilities. An agreement on the cessation of hostilities was reached on 20 July 1954. The French withdrew and by the Paris Agreement of 29 Dec. 1954 completed the transfer of sovereignty to Vietnam which was divided along the 17th parallel into Communist North Vietnam and the non-Communist South. From 1959 the North promoted insurgency in the south, provoking retaliation from the USA. A full scale guerrilla war developed.

In Paris on 27 Jan. 1973 an agreement was signed ending the war in Vietnam. However, hostilities continued between the North and the South until the latter's defeat in 1975. Between 150,000 and 200,000 South Vietnamese fled the country. The unification of North and South Vietnam into the Socialist Republic of Vietnam finally took place on 2 July 1976. Vietnam invaded Cambodia in Dec. 1978 and China attacked Vietnam in consequence. In 1986 Vietnam implemented economic reforms, gradually shifting to a multi-sectoral market economy under state regulation. On 11 July 1995 Vietnam and the USA normalized relations. On 28 July 1995 Vietnam became an official member of the Association of South East Asian Nations (ASEAN) and in the same month signed a trade agreement with the European Union.

CONSTITUTION AND GOVERNMENT

The National Assembly unanimously approved a new constitution on 15 April 1992. Under this the Communist Party retains a monopoly of power and the responsibility for guiding the state according to the tenets of Marxism-Leninism and Ho Chi Minh, but with certain curbs on its administrative functions. The powers of the National Assembly are increased. The 450-member *National Assembly* is elected for 5-year terms. Candidates may be proposed by the Communist Party or the Fatherland Front (which groups various social organizations), or they may propose themselves as individual Independents. The Assembly convenes 3 times a year and appoints a prime minister and cabinet. It elects the *President*, the head of state. The latter heads a *State Council* which issues decrees when the National Assembly is not in session.

The ultimate source of political power is the Communist Party of Vietnam, founded in 1930; it had 2.2m. members in 1996.

KEY HISTORICAL EVENTS

Following an agreement in Dec. 1989 on a constitution for a unified state, the (northern) Yemen Arab Republic and the (southern) People's Democratic Republic of Yemen were united as the Republic of Yemen on 22 May 1990. In Aug. 1993 Vice-President Ali Salem Albidh withdrew to Aden demanding reforms as a condition of re-joining President Saleh in Sana'a. Albidh agreed to a modified reform programme but clashes between north and south escalated into full civil war at the beginning of May. Southern officials announced their secession from Yemen on 21 May 1994. Aden was captured by northern forces on 7 June 1994. The

former vice-president and government went into exile.

TERRITORY AND POPULATION

Yemen is bounded in the north by Saudi Arabia, east by Oman, south by the Gulf of Aden and west by the Red Sea. The territory includes 112 islands including Kamaran (181 sq. km) and Perim (300 sq. km) in the Red Sea and Socotra (3,500 sq. km) in the Gulf of Aden. The islands of Greater and Lesser Hanish is claimed by both Yemen and Eritrea. On 15 Dec. 1995 Eritrean troops occupied it, and Yemen retaliated with aerial bombardments. A ceasefire was agreed at presidential level on 17 Dec. On 20 Dec. the UN resolved to send a good offices mission to the area. In an agreement of 21 May 1996 brokered by France, Yemen and Eritrea renounced the use of force to settle the dispute and agreed to submit it to arbitration. The area is 555,000 sq. km excluding the desert Empty Quarter (Rub Al-Khali). A dispute with Saudi Arabia broke out in Dec. 1994 over some 1,500–2,000 km of undemarcated desert boundary. A memorandum of understanding signed on 26 Feb. 1995 reaffirmed the border agreement reached at Taif in 1934, and on 12 June 2000 a 'final and permanent' border treaty between the 2 countries was signed. An agreement of June 1995 completed the demarcation of the border with Oman.

The population was estimated at 15.8m. in 1995; density, 21 persons per sq. km.

The UN gives a projected population for 2010 of 25.45m.

In 1998, 36.2% of the population lived in urban areas. At the census of 1994 the population was 14,832,673. There were 1,168,199 citizens working abroad mainly in Saudi Arabia and the United Arab Emirates not included in the census total. Since 1990 Saudi Arabia has compulsorily repatriated almost all Yemeni workers. In 1994 there were 17 governorates plus the capital city, Sana'a:

1994 census population		1994 census population	
Abyan	414,543	Lahej	634,652

KEY HISTORICAL EVENTS

The assassination of Archduke Franz Ferdinand of Austria in Bosnia on 28 June 1914 precipitated the First World War. In the winter of 1915–16 the Serbian army was forced to retreat to Corfu, where the government aimed at a centralized, Serb-run state. But exiles from Croatia and Slovenia wanted a South Slav federation. This was accepted by the victorious Allies as the basis for the new state. The Croats were forced by the pressure of events to join Serbia and Montenegro on 1 Dec. 1918.

From 1918–29 the country was known as the Kingdom of the Serbs, Croats and Slovenes.

A constitution of 1921 established an assembly but the trappings of parliamentarianism could not bridge the gulf between Serbs and Croats. The Croat peasant leader Radić was assassinated in 1928; his successor, Vlatko Maček, set up a separatist assembly in Zagreb. On 6 Jan. 1929 the king suspended the constitution and established a royal dictatorship, redrawing provincial boundaries without regard for ethnicity. In Oct. 1934 he was murdered by a Croat extremist while on an official visit to France.

During the regency of Prince Paul, the government pursued a pro-fascist line. On 25 March 1941 Paul was induced to adhere to the Axis Tripartite Pact. On 27 March he was overthrown by military officers in favour of the boy king Peter. Germany invaded on 6 April. Within 10 days Yugoslavia surrendered; king and government fled to London. Resistance was led by a royalist group and the communist-dominated partisans of Josip Broz, nicknamed Tito. Having succeeded in liberating Yugoslavia, Tito set up a Soviet-type constitution. But he was too independent for Stalin, who sought to topple him. However, Tito made a *rapprochement* with the west and it was the Soviet Union under Khrushchev which had to extend the olive branch in 1956. Yugoslavia evolved its 'own road to socialism'. Collectivization of agriculture was abandoned; and Yugoslavia became a champion of international 'non-alignment'. A collective presidency came into being with the death of Tito in 1980.

Dissensions in Kosovo between Albanians and Serbs, and in parts of Croatia between Serbs and Croats, reached crisis point after 1988. On 25 June 1991 Croatia and Slovenia declared independence. Fighting began in Croatia between Croatian forces and Serb irregulars from Serb-majority areas of Croatia. On 25 Sept. the UN Security Council imposed a mandatory arms embargo on Yugoslavia. A 3-month moratorium agreed at EU peace talks on 30 June having expired, both Slovenia and Croatia declared their complete independence from the Yugoslav federation on 8 Oct. After 13 ceasefires had failed, a fourteenth was signed on 23 Nov. under UN auspices. A Security Council resolution of 27 Nov. proposed the deployment of a UN peace-keeping force if the ceasefire was kept. Fighting, however, continued. On 15 Jan. 1992 the EU recognized Croatia and Slovenia as independent states. Bosnia-Herzegovina was recognized on 7 April 1992 and Macedonia on 8 April 1993. A UN delegation began monitoring the ceasefire on 17 Jan. and the UN Security Council on 21 Feb. voted to send a 14,000-strong peace-keeping force to Croatia and Yugoslavia. On 27 April 1992 Serbia and Montenegro created a new federal republic of Yugoslavia.

On 30 May, responding to further Serbian military activities in Bosnia and Croatia, the UN Security Council voted to impose sanctions. In mid-1992 NATO committed air, sea and eventually land forces to enforce sanctions and protect

humanitarian relief operations in Bosnia. At a joint UN-EC peace conference on Yugoslavia held in London on 26–27 Aug. some 30 countries and all the former republics of Yugoslavia endorsed a plan to end the fighting in Croatia and Bosnia, install UN supervision of heavy weapons, recognize the borders of Bosnia-Herzegovina and return refugees. At a further conference at Geneva on 30 Sept. the Croatian and Yugoslav presidents agreed to make efforts to bring about a peaceful solution in Bosnia, but fighting continued. Following the Bosnian-Croatian-Yugoslav (Dayton) agreement all UN sanctions were lifted in Nov. 1995.

In July 1997 Slobodan Milošević switched his power base to become president of federal Yugoslavia. The former Yugoslav foreign minister, Milan Milutinović, succeeded Milošević as Serbian President. Meanwhile, in Montenegro, the pro-western Milo Djukanović succeeded a pro-Milošević president.

In 1998 unrest in Kosovo, with its largely Albanian population, led to a bid for outright independence. Violence flared resulting in what a US official described as 'horrendous human rights violations', including massive shelling of civilians and destruction of villages. A US-mediated agreement to allow negotiations to proceed during an interim period of autonomy allowed for food and medicine to be delivered to refugees and American support for a degree of autonomy (short of independence), accepted in principle by President Milošević, lifted the immediate threat of NATO air strikes. Further outbreaks of violence in early 1999 were followed by the departure of the 800-strong team of international 'verifiers' of the fragile peace. Peace talks in Paris broke down without a settlement though subsequently Albanian freedom fighters accepted terms allowing them broad autonomy. The sticking point on the Serbian side was the international insistence on having 28,000 NATO-led peacemakers in Kosovo to keep apart the warring factions. Meanwhile, the scale of Serbian repression in Kosovo persuaded the NATO allies to take direct action. On the night of 24 March 1999 NATO aircraft began a bombing campaign against Yugoslavian military targets. Further Serbian provocation in Kosovo caused hundreds of thousands of ethnic Albanians to seek refuge in neighbouring countries. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo.

The general election held on 24 Sept. 2000 resulted in a victory for the opposition democratic leader Vojislav Koštunica, but President Milošević demanded a second round of voting. A strike by miners at the Kolubara coal mine on 29 Sept. led to protests and a relatively peaceful revolution centred on Belgrade on 5 Oct. With several hundred thousand opposition supporters in the centre of Belgrade, the parliament building was set on fire and on 6 Oct. Slobodan Milošević accepted defeat. He was arrested on 1 April 2001 after a 30-hour confrontation with the authorities.

The federal parliament consists of 2 chambers: the *Chamber of the Republics* has 40 members, 20 each elected from the assemblies of Montenegro and Serbia. Its assent is necessary to all legislation. The *Chamber of Citizens* has 138 members, elected by universal suffrage.

REPUBLICS AND PROVINCES

In Dec. 1992 the new self-styled Federal Republic of Yugoslavia comprised the 2 republics of Montenegro and Serbia, and the 2 provinces of Kosovo and Metohija, and Vojvodina within Serbia.

MONTENEGRO

KEY HISTORICAL EVENTS

Montenegro emerged as a separate entity on the break-up of the Serbian Empire in 1355. Owing to its mountainous terrain, it was never effectively subdued by Turkey. It was ruled by Bishop Princes until 1851, when a royal house was founded. The Treaty of Berlin (1828) recognized the independence of Montenegro and doubled the size of the territory. The remains of King Nicholas I, who was deposed in 1918, were returned to Montenegro for reburial in Oct. 1989. Though part of the Yugoslav federation, Montenegro holds jealously to its independence and tries to keep its political distance from Serbia.

TERRITORY AND POPULATION

Montenegro is a mountainous region which opens to the Adriatic in the southwest. It is bounded in the west by Croatia, northwest by Bosnia-Herzegovina, in the northeast by Serbia and in the southeast by Albania. The capital is Podgorica (population, 1997 estimate, 162,172). Its area is 13,812, sq. km. Population at the 1991 census was 615,035, of which the predominating ethnic groups were Montenegrins (380,467), Muslims (89,614), Serbs (57,453) and Albanians (40,415). Population density per sq. km, 44.5. Estimate, 1998, 650,000; density, 47.1 per sq. km.

CONSTITUTION AND GOVERNMENT

There is an 85-member single-chamber National Assembly.

RECENT ELECTIONS

In the general election of 31 May 1998 the party of Milo Djukanović, the Coalition for a Better Life, gained 49.5% of the vote and 42 seats (of 78) in defeating the Socialist People's Party, led by federal president Slobodan Milošević's ally, Momir Bulatović,

Yugoslavia's prime minister. The Socialist People's Party gained 29 seats with 36.1%. The other 7 seats were shared by 3 parties. Turn-out was 76%. Montenegro had ceased to recognize federal Yugoslavia's government earlier in the month.

Incumbent Momir Bulatović gained 47.5% and Milo Djukanović won 46.7%. They met in a run-off which Djukanović, a staunch opponent of Milošević, won with 50.8% against Bulatović's 49.2%.

SERBIA

KEY HISTORICAL EVENTS

The Serbs received Orthodox Christianity from the Byzantines in 891, but shook off the latter's suzerainty to form a prosperous state, firmly established under Stevan Nemanja (1167–96). A Serbian Patriarchate was established at Peć during the reign of Stevan Dušan (1331–55). Dušan planned the conquest of Constantinople, but he was forestalled by incursions of Turks. After he died many Serbian nobles accepted Turkish vassalage; the reduced Serbian state under Prince Lazar received the coup de grace at Kosovo on St Vitus day, 1389. Turkish preoccupations with a Mongol invasion and wars with Hungary, however, postponed the total incorporation of Serbia into the Ottoman Empire until 1459.

The Turks permitted the Orthodox church to practise, though the Patriarchate was abolished in 1776. The native aristocracy was eliminated and replaced by a system of fiefdoms held in return for military or civil service. Local self-government based on rural extended family units (*zadruga*) continued. In its heyday the Ottoman system probably bore no harder on the peasantry than the Christian feudalism it had replaced, but with the gradual decline of Ottoman power, corruption, oppression and reprisals led to economic deterioration and social unrest.

In 1804 murders carried out by mutinous Turkish infantry provoked a Serbian rising under Djordje Karadjordje. The Sultan's army disciplined the mutineers, but was then defeated by the intransigent Serbs. By the Treaty of Bucharest (1812), however, Russia agreed that Serbia, known as Servia until 1918, should remain Turkish. The Turks reoccupied Serbia with ferocious reprisals. A new rebellion broke out in 1815 under Miloš Obrenović which, this time with Russian support, won autonomy for Serbia within the Ottoman empire. Obrenović had Karadjordje murdered in 1817. In 1838 he was forced to grant a constitution establishing an appointed state council, and abdicated in 1839. In 1842 a coup overthrew the Obrenovićs and Alexander Karadjordjević was elected as ruler. He was deposed in 1858.

During the reign of the western-educated Michael Obrenović (1860 until his assassination in 1868) the foundations of a modern centralized and militarized state were laid, and the idea of a 'Great Serbia', first enunciated in Prime Minister Garašanin's *Draft Programme* of 1844, took root. Milan Obrenović, adopting the title of king, proclaimed formal independence in 1882. He suffered defeats against Turkey (1876) and Bulgaria (1885) and abdicated in 1889. Alexander Obrenović was assassinated in 1903, and replaced by Peter Karadjordjević, who brought in a period of stable constitutional rule.

In its foreign policy, Serbia's striving for an outlet to the sea was consistently thwarted by Austria. Annexing Bosnia in 1908, Austria forced the Serbs to withdraw from the Adriatic after the first Balkan war (1912).

Following the break-up of Yugoslavia, in March 1998 a coalition government was formed between the Socialist Party of Slobodan Milošević and the ultra-nationalist Radical Party.

Economic sanctions against Serbia are still in force following the Serbian repression in Kosovo and the air attacks of March–June 1999, but the price of basic necessities remains low and a start has been made on repairing war-damaged roads and bridges.

TERRITORY AND POPULATION

Serbia is bounded in the northwest by Croatia, in the north by Hungary, in the northeast by Romania, in the east by Bulgaria, in the south by Macedonia and in the west by Albania, Montenegro and Bosnia-Herzegovina. It includes the 2 provinces (formerly autonomous) of Kosovo and Metohija in the south and Vojvodina in the north. With these Serbia's area is 88,361 sq. km; without, 55,968 sq. km. The capital is Belgrade (population estimate, 1997, 1,597,599). Population at the 1991 census was (with Kosovo and Vojvodina) 9,778,991, of which the predominating ethnic group was Serbs (6,446,595). Population density per sq. km, 110.7; (without Kosovo and Vojvodina), population estimate 5,808,906, of which the predominating ethnic group was Serbs (5,108,682). Population density per sq. km, 103.8. 1997 estimate (with Kosovo and Vojvodina), 9,956,662; density, 112.7 per sq. km; (without) 5,791,643; density, 103.5 per sq. km.

CONSTITUTION AND GOVERNMENT

In Sept. 1990 a new constitution was adopted by the National Assembly. It defined Serbia as a 'democratic' instead of a 'socialist' republic, lay down a framework for

multi-party elections, and described Serbia as 'united and sovereign on all its territory', thus stripping Kosovo and Vojvodina of the attributes of autonomy granted by the 1974 federal constitution.

There is a 250-member single-chamber National Assembly. The *President* is elected by universal suffrage for not more than two 5-year terms.

KOSOVO AND METOHIJA

KEY HISTORICAL EVENTS

Kosovo has a large ethnic Albanian majority. Following Albanian-Serb conflicts, the Kosovo and Serbian parliaments adopted constitutional amendments in March 1989 surrendering much of Kosovo's autonomy to Serbia. Renewed Albanian rioting broke out in 1990. The Prime Minister and 6 other ministers resigned in April 1990 over ethnic conflicts. In July 1990, 114 of the 130 Albanian members of the National Assembly voted for full republican status for Kosovo but the Serbian National Assembly declared this vote invalid and unanimously voted to dissolve the Kosovo Assembly. Direct Serbian rule was imposed causing widespread violence. Western demands for negotiations in granting Kosovo some kind of special status were rejected. Ibrahim Rugova, the leader of the main Albanian party, the Democratic League of Kosovo (LDK), declared himself 'president' demanding talks on independence. In 1998 armed conflict between Yugoslavia and the Kosovo Liberation Army led to 200,000 people, or a tenth of the population of the whole province, fleeing the fighting. Further repression by Serbian forces led to the threat of NATO direct action. Air strikes against Yugoslavian military targets began on 24 March 1999. Retaliation against Albanian Kosovars led to a massive exodus of refugees. On 9 June after 78 days of air attacks NATO and Yugoslavia signed an accord on the Serb withdrawal from Kosovo, and on 11 June NATO's peacekeeping force, KFOR, entered Kosovo.

TERRITORY AND POPULATION

Area: 10,887 sq. km. The capital is Priština. The 1991 census was not taken. Population estimate of Kosovo and Metohija, 1991, 1,956,196 (1,596,072 Albanians, 194,190 Serbs); density, 179.7 per sq. km. The population in 1998 was 2,190,000 (84% Albanians, 9% Serbs and 7% others). By Sept. 1999 the population had declined to 1,506,000. Although the number of Albanians had dropped by over 430,000, the breakdown of the population had changed to 93% Albanians, 5% Serbs and 2% others. Population estimate of Priština, 1997, 242,000.

The authorities in Belgrade did not recognize the election as Kosovo's 100,000-strong Serb population had not participated. Turn-out was 79%.

VOJVODINA

KEY HISTORICAL EVENTS

After the Battle of Kosovo in 1389 Turkish attacks on the Balkans led to mass migrations of Serbian people to Vojvodina. Turkish rule ended after their 1716–18 war with Austria and the Požarevac peace agreement. In exchange for acting as frontier protectors, the Austrians granted the people of Vojvodina freedom of confession and religious autonomy. However, by 1848 discontent had brewed and a short-lived revolution occurred, in which the Serbs formed an alliance with the Croats, and Vojvodina was briefly declared as an independent dukedom. After the First World War Vojvodina became part of the first Yugoslav state and, following its liberation in 1945, it became an autonomous region within the Federal Republic of Yugoslavia. This autonomy was brought into question after Vojvodina's largely anti-Milošević provincial assembly resigned their positions in 1988.

Republic of Zambia

Capital: Lusaka

Population estimate, 2000: 9·87m.

GDP per capita: (PPP\$) 719

HDI/world rank: 0·420/153

KEY HISTORICAL EVENTS

The majority of the population is of Bantu origin. There are more than 70 different tribes, the most important being the Bemba and the Bgoni in the northeast. One of the more successful of the invading tribes was the Lozi under Lewanika, who obtained the protection of the British government in 1891. In 1900 the British South Africa Company acquired trading and mining rights. From 1911 the territory was known as Northern Rhodesia and in 1924 the Crown took over the

administration.

In 1953 the Federation of Rhodesia and Nyasaland, of which Northern Rhodesia was a part, was created. Federation brought economic benefits to Northern Rhodesia but it was from the outset opposed by African leaders. In March 1963 Britain agreed to Northern Rhodesia's right to secede from the Federation. In Jan. 1964 full internal self-government was attained. On 24 Oct. Northern Rhodesia became an independent republic within the Commonwealth, changing its name to Zambia. A highly centralized one-party state was created which suffocated the emergent economy. Living standards fell sharply and the production of copper, Zambia's biggest foreign exchange earner, almost halved. In 1991 the Movement for Multiparty Democracy (MMD) was elected on a promise to transform the economy.

The projected population for 2010 is 11·72m.

The republic is divided into 9 provinces. Area, population and chief towns:

KEY HISTORICAL EVENTS

The territory which now forms Zimbabwe was administered by the British South Africa Company from the beginning of European colonization in 1890 until 1923 when it was granted the status of a self-governing colony. In 1911 it was divided into Southern and Northern Rhodesia (*see* Zambia). In 1953 Southern and Northern Rhodesia were again united, along with Nyasaland, to form the Federation of Rhodesia and Nyasaland. When this federation was dissolved on 31

Dec. 1963 Southern Rhodesia reverted to the status of a self-governing colony within the British Commonwealth.

On 11 Nov. 1965 the white-dominated government issued a unilateral declaration of independence (UDI). Thereupon the Governor dismissed the prime minister, Ian Smith, and his cabinet and the British government reasserted formal responsibility for Rhodesia; but effective internal government was carried on by the Smith cabinet.

From 1–3 Dec. Harold Wilson, the British prime minister, met Smith on board H.M.S. *Tiger* and drafted a 'Working Document' on progress towards legal independence. This statement was rejected by the Smith government. On 2 March 1970 the Smith government declared Rhodesia a republic and adopted a new constitution.

On 3 March 1978 Smith signed a constitutional agreement with the internationally-backed nationalist leaders. A draft constitution was published in Jan. 1979 and was accepted by the white electorate in a referendum. Following the Commonwealth Conference held in Lusaka in Aug. 1979, elections took place in March 1980 resulting in a victory for the Zimbabwe African National Union (ZANU). Southern Rhodesia became the Republic of Zimbabwe.

Almost immediately, the question of land redistribution became a hot political issue. In colonial days, Africans had been ejected from the best farming country. All sides recognized the need for reform but were unable to agree on the means of achieving it. In 20 years, 3·5m. ha of land have been acquired from white farmers, with the UK footing the £44m. bill for resettlement, but only 70,000 families have benefited. Another 400,000 ha went to senior colleagues in President Mugabe's government. The economy, meanwhile, suffered roaring inflation, unemployment and acute shortages. A policy of land occupation, with black settlers taking over white-owned farms, started in early 2000. Pressures on President Mugabe to restore the rule of law were ignored and violence escalated. Elections took place in June 2000, in which President Mugabe achieved a narrow victory. Violence continued during the months which followed, as support for Mugabe dwindled.

TERRITORY AND POPULATION

Zimbabwe is bounded in the north by Zambia, east by Mozambique, south by South Africa and west by Botswana and the Caprivi Strip of Namibia. The area is 150,872 sq. miles (390,759 sq. km). The population was (1992 census) 10,401,767 (51·2% female). Estimate, 1995, 11,536,000 (50·4% female); density, 29·5 per sq. km. In 1998, 66·1% of the population were rural.

By 2010 the effects of AIDS are expected to result in the population declining to 9m.

There are 8 provinces and 2 cities, Harare and Bulawayo, with provincial status. Area and population (1992 census):

	Area (sq. km)	Population		Area (sq. km)	Population
Bulawayo	479	620,936	Manicaland	36,459	1,537,676
Harare	872	1,478,810	Mashonaland Central	28,374	857,318

ZIMBABWE

	<i>Area</i> (sq. km)	<i>Population</i>		<i>Area</i> (sq. km)	<i>Population</i>
Mashonaland East	32,230	1,033,336	Matabeleland North	75,025	640,957
Mashonaland West	57,441	1,116,928	Matabeleland South	54,172	591,747
Msasvingo	56,566	1,221,845	Midlands	49,166	1,302,212

Harare, the capital, had a population in 1999 of 1,686,000. Other main cities (with 1992 census populations) were Bulawayo (620,936), Chitungwiza (274,035), Mutare (131,808) and Gweru (124,735). The population is approximately 98% African, 1% mixed and Asian and there are approximately 70,000 whites. The main ethnolinguistic groups are the Shona (71%), Ndebele (16%), Ndau (3%) and Nyanja (3%). Other smaller ones include Kalanga, Manyika, Tonga and Lozi.

The official language is English.

SOCIAL STATISTICS

1995 births, 434,000; deaths, 158,000. Rates, 1995: birth, 38.8 per 1,000 population; death 14.1 per 1,000. Annual population growth rate, 1990–99, 1.7%. Zimbabwe's expectation of life at birth in 1998 was an estimated 39 years, down from 54 in 1993. The sharp decline is largely attributed to the huge number of people in the country with HIV. Researchers predict that by 2008 it will have dropped to 31. Infant mortality, 1998, 59 per 1,000 live births; fertility rate, 1999, 3.7 births per woman.

CLIMATE

Though situated in the tropics, conditions are remarkably temperate throughout the year because of altitude, and an inland position keeps humidity low. The warmest weather occurs in the three months before the main rainy season, which starts in Nov. and lasts till March. The cool season is from mid-May to mid-Aug. and, though days are mild and sunny, nights are chilly. Harare, Jan. 69°F (20.6°C), July 57°F (13.9°C). Annual rainfall 33" (828 mm). Bulawayo, Jan. 71°F (21.7°C), July 57°F (13.9°C). Annual rainfall 24" (594 mm). Victoria Falls, Jan. 78°F (25.6°C), July 61°F (16.1°C). Annual rainfall 28" (710 mm).

CONSTITUTION AND GOVERNMENT

The Constitution provides for a single-chamber 150-member Parliament (*House of Assembly*), universal suffrage for citizens over the age of 18, an *Executive President* (elected for a 6-year term of office by Parliament), an independent judiciary enjoying security of tenure and a Declaration of Rights, derogation from certain of the provisions being permitted, within specified limits, during a state of emergency. The House of Assembly is elected for 5 year terms: 120 members are elected by universal suffrage, 10 are chiefs elected by all the country's tribal chiefs, 12 are appointed by the President and 8 are provincial governors. The constitution can be amended by a two-thirds parliamentary majority.

In a referendum on 12–13 Feb. 2000 on the adoption of a new constitution 697,754 (54.6%) voted against and only 578,210 in favour. Under the new constitution Zimbabwe would have had an Executive President and an Executive Prime Minister sharing power, but many people felt that it would have strengthened President Mugabe's hold on power.

National Anthem. 'Ngaikomborewe Nyika ye Zimbabwe' ('Blessed be the Land of Zimbabwe'); words by Dr Solomon M. Mutswairo; tune by Fred Changundega.

RECENT ELECTIONS

Presidential elections were held on 17 March 1996. The electorate was 4.9m.; turnout was 35%. President Mugabe was re-elected unopposed.

At the elections of 24–25 June 2000 turnout was 57%. The Zimbabwe African National Union-Patriotic Front (ZANU-PF) gained 62 of the 150 available seats (48.6% of votes cast). The Movement for Democratic Change, established in Jan. 2000, won 57 seats (47.0%) and the Zimbabwe African National Union-Ndonga gained 1 seat. 12 seats went to appointed non-constituency members, 8 went to ex-officio governor members and 10 to ex-officio chief members. The conduct of Mugabe's ZANU-PF during the pre-election campaign received widespread international condemnation. White-owned farms were illegally seized and there was a campaign of intimidation against opposition supporters that saw more than 30 people die.

Air Force. The Air Force (ZAF) has a strength of (1999) about 4,000 personnel and 58 combat aircraft. The headquarters of the ZAF and the main ZAF stations are in Harare; the second main base is at Gweru, with many secondary airfields throughout the country. There were 58 combat aircraft, including Hunters and F-7s (MiG-21), and 24 armed helicopters.

INTERNATIONAL RELATIONS

Zimbabwe is a member of UN, WTO, the Commonwealth, OAU, African Development Bank, COMESA and SADC and is an ACP member state of the ACP-EU relationship. Claiming to act on behalf of the 14 member Southern African Development Community (SADC), Zimbabwe has committed 10,000 troops to the campaign to support the Democratic Republic of the Congo's President Laurent Kabila.

ECONOMY

Agriculture accounted for 19.5% of GDP in 1998, industry 24.4% and services 56.1%.

Robert Mugabe's 20-year rule has left the economy in a desperate situation. There is roaring inflation, heavy unemployment and shortages of food and other necessities. In Feb. 2000 the country ran out of gasoline because it could not pay the import bills.

Policy. The second phase of structural adjustment dubbed Zimbabwe Programme for Economic and Social Transformation (ZIMPREST) was launched in early 1998. Its goals are similar to those of the first phase (1991–95), promoting a market economy by economic stabilization, liberalization of trade, deregulation, reform of the public sector and social reform. But confidence in the economy was undermined by promises to pay compensation (Z\$365m.) to war veterans and to make compulsory purchase of 1,471 privately-owned farms for resettlement. Meanwhile, inflation is beyond control and unemployment is high. Were it not for support from South Africa and other neighbouring states, the economy would almost certainly collapse.

Performance. GDP is estimated to have grown by 2.4% in 1998 but in 1999 contracted by 1.3%. For 2000 it was forecast to shrink by 6%. Zimbabwe's total GDP in 1998 was US\$6.3bn.

Budget. The 1999 budget forecast a budget deficit of 6%.

Revenue and expenditure (in Z\$1,000):

	1996–97	1997–98
Revenue	27,289	52,152
Expenditure	32,366	63,857

The top rate of income tax is 50%; the top corporate income tax rate is 35%.

Currency. The unit of currency is the *Zimbabwe dollar* (ZWD), divided into 100 cents. Gold reserves were 650,000 troy oz in Jan. 2000 and foreign exchange reserves US\$127m. in Feb. 1998. The currency was devalued 17% in Jan. 1994 and made fully convertible. Its value dropped by 65% in 1998. It was devalued again in Aug. 2000 by 24%. Whereas at the time of independence the Zimbabwean dollar was on a parity with the US dollar, by 2000 it was worth less than 2 cents. Inflation doubled from 14.5% in 1997 to 35% by the end of 1998 and rose to 60% by early 2000. Total money supply was Z\$21,320m. in Dec. 1997.

Banking and Finance. The Reserve Bank of Zimbabwe is the central bank (established 1965; *Governor*, Dr Leonard Tsumba). It acts as banker to the government and to the commercial banks, is the note-issuing authority and co-ordinates the application of the government's monetary policy. The Zimbabwe Development Bank, established in 1983 as a development finance institution, is 51% government-owned. In 1997 there were 7 commercial and 5 merchant banks. There are 5 registered finance houses, 3 of which are subsidiaries of commercial banks.

The IMF announced in June 1998 that it was to lend Zimbabwe US\$175m. in the form of a 13-month standby credit which would allow Harare to draw US\$52m. immediately to replenish its depleted reserves.

There is a stock exchange.

Weights and Measures. The metric system is in use but the US short ton is also used.

ENERGY AND NATURAL RESOURCES

Electricity. Installed capacity was 2m. kW in 1997. In 1997 Zimbabwe Electricity Supply Authority's (Zesa) 5 power stations supplied 7,323.3 GWh, and a further 3,171.5 GWh was imported via the Southern African Power Pool (SAPP). Electricity sales during the financial year 1995–96 increased by 3.6% and revenues grew by 28% from US\$2,222.7m. to US\$2,852.7m. Consumption per capita in 1997 was 975 kWh.

Minerals. The total value of all minerals produced in 1995 was Z\$5,249.3m. 1995 production: gold, 23.9 tonnes, value Z\$2,395m.; nickel, value (1993) Z\$369.1m.; asbestos, 0.70m. tonnes; coal (1996), 5.2m. tonnes. Diamond production in 1998 totalled 70,000 carats.

Agriculture. Agriculture is the largest employer, providing jobs for 25% of the workforce.

A constitutional amendment providing for the compulsory purchase of land for peasant resettlement came into force in March 1992. A provision to seize white-owned farmland for peasant resettlement was part of the government's new draft constitution that was rejected in the referendum of Feb. 2000. During the early part of 2000 there was widespread violence with squatters occupying large areas of white-owned farms.

The staple food crop is maize. Tobacco is the most important cash crop. Production, 1998, in 1,000 tonnes: sugarcane, 4,808; maize, 1,418; wheat, 280; seed cotton, 273; tobacco, 260; cassava, 165; cottonseed, 163; soybeans, 111; bananas, 80; sorghum, 72; oranges, 70; groundnuts, 60; millet, 50. Zimbabwe is the world's second largest exporter of flue-cured tobacco. In 1996 more than 201m. kg of tobacco were sold, fetching Z\$5.8bn. More than 150,000 people work in the tobacco industry. Tobacco is a highly commercial crop, worth nearly 60 times as much as the same acreage planted with soya or maize.

Livestock (1996): cattle, 5.44m.; pigs, 266,000; sheep, 530,000; goats, 2.7m.; chickens, 15m. Dairy products (1998 estimates, in 1,000 tonnes): milk, 570; meat, 142.

Forestry. In 1995 forests covered 8.71m. ha, or 22.5% of the total land area (down from 8.96m. ha in 1990). Timber production in 1998 was 8.38m. cu. metres.

Environment. According to the *World Bank Atlas* carbon dioxide emissions were the equivalent of 1.6 tonnes per capita in 1996.

Fisheries. Trout, prawns and bream are farmed to supplement supplies of fish caught in dams and lakes. The catch in 1998 was 16,386 tonnes (all from inland waters).

INDUSTRY

According to the Financial Times Survey (FT 500) published in May 2000, the largest companies in Zimbabwe in Jan. 2000 were Barclays Bank Zimbabwe (market capitalization of US\$551.8m.), Delta Corporation (market capitalization of US\$306m.) and Innscor Africa (market capitalization of US\$161.6m.).

Metal products account for over 20% of industrial output. Important agro-industries include food processing, textiles, furniture and other wood products.

Labour. The labour force in 1996 totalled 5,281,000 (56% males). Unemployment in Jan. 1998 was around 50%.

Trade Unions. There is a Zimbabwe Congress of Trade Unions which has 26 affiliated unions, representing more than 400,000 workers in 1998.

INTERNATIONAL TRADE

Foreign debt was US\$4,716m. in 1998. Since 1 Jan. 1995 foreign companies have been permitted to remit 100% of after-tax profits. The Customs Agreement with South Africa was extended in 1982.

Imports and Exports. In 1996 exports totalled US\$2,403m.; imports, US\$2,819m.

Principal exports in 1993 (in US\$1m.): tobacco, 365; ferrochrome, 142; clothing and textiles, 122; nickel, 56; cotton lint, 26; steel, 16.

Main import suppliers, 1996 (% of total trade): South Africa, 38.3%; UK, 7.9%; Japan, 5.1%; USA, 5.0%; Germany, 4.9%. Main export destinations, 1996: UK, 10.1%; South Africa, 9.6%; Germany, 7.9%; USA, 6.7%; Japan, 5.1%.

Recent estimates suggest a marked deterioration in balance of payments.

Trade Fairs. The highlight of the year is the Zimbabwe International Book Fair, held in Harare in August.

COMMUNICATIONS

Roads. In 1996 the road network covered 18,338 km, of which 8,700 km were paved. Number of vehicles, 1996: passenger cars, 323,000; commercial vehicles, 32,000; motorcycles, 362,000. There were 38,777 road accidents in 1996 with 1,205 fatalities.

Civil Aviation. There are 3 international airports: Harare (the main airport), Bulawayo and Victoria Falls. Air Zimbabwe, the state-owned national carrier, operates domestic services and in 1998 flew to the major centres in Africa and Europe. Zimbabwe Express Airlines likewise operates internal services, and had flights in 1998 to Johannesburg. Zimbabwe was also served in 1998 by Aero Zambia, Air Austral, Air Botswana, Air France, Air Malawi, Air Mauritius, Air Namibia, Air Tanzania Corporation, British Airways, Cameroon Airlines, Delta Air Lines, Egyptair, Ethiopian Airlines, Expedition Airways, Ghana Airways, Kenya Airways, KLM, LAM, Lufthansa, Royal Swazi National Airways Corporation, South African Airways, Swissair, TAAG and Uganda Airlines. In 1998 Harare handled 1,262,000 passengers (905,000 on international flights).

Shipping. Zimbabwe's outlets to the sea are Maputo and Beira in Mozambique, Dar es Salaam, Tanzania and the South African ports.

Telecommunications. Zimbabwe had 212,000 main telephone lines in 1997 (18.9 for every 1,000 persons). In 1999 there were 150,000 PCs in use (13.0 for every 1,000 persons), 256,000 mobile phone subscribers in Sept. 2000 up from 55,000 in 1998, and in 1995, 4,100 fax machines. SOCIAL INSTITUTIONS

Justice. The general common law of Zimbabwe is the Roman Dutch law as it applied in the Colony of the Cape of Good Hope on 10 June 1891, as subsequently

modified by statute. Provision is made by statute for the application of African customary law by all courts in appropriate cases.

The death penalty is authorized. The last execution took place in 1997.

The Supreme Court consists of the Chief Justice and at least 2 Supreme Court judges. It is the final court of appeal. It exercises appellate jurisdiction in appeals from the High Court and other courts and tribunals; its only original jurisdiction is that conferred on it by the Constitution to enforce the protective provisions of the Declaration of Rights. The Court's permanent seat is in Harare but it sits regularly in Bulawayo also.

The High Court is also headed by the Chief Justice, supported by the Judge President and an appropriate number of High Court judges. It has full original jurisdiction, in both Civil and Criminal cases, over all persons and all matters in Zimbabwe. The Judge President is in charge of the Court, subject to the directions of the Chief Justice. The Court has permanent seats in both Harare and Bulawayo and sittings are held three times a year in 3 other principal towns.

Regional courts, established in Harare and Bulawayo but also holding sittings in other centres, exercise a solely criminal jurisdiction which is intermediate between that of the High Court and the Magistrates' courts. Magistrates' courts, established in 20 centres throughout the country, and staffed by full-time professional magistrates, exercise both civil and criminal jurisdiction.

Primary courts consist of village courts and community courts. Village courts are presided over by officers selected for the purpose from the local population, sitting with two assessors. They deal with certain classes of civil cases only and have jurisdiction only where African customary law is applicable. Community courts are presided over by presiding officers in full-time public service who may be assisted by assessors. They have jurisdiction in all civil cases determinable by African customary law and also deal with appeals from village courts. They also have limited criminal jurisdiction in respect of petty offences.

The population in penal institutions in Aug. 1998 was 18,271 (155 per 100,000 of national population).

Religion. Over a third of the population adhere to traditional animist religion. In 1997 approximately 2.42m. persons were Protestants, 1.54m. African Christians, 800,000 Roman Catholics and 2.03m. followers of other religions.

Education. Education is compulsory. 'Manageable' school fees were introduced in 1991; primary education had hitherto been free to all. All instruction is given in English. There are also over 3,800 private primary schools and over 950 private secondary schools, all of which must be registered by the Ministry of Education. In 1998 there were 2,507,098 pupils at primary schools and 847,296 pupils at secondary schools. In 1998 the adult literacy rate was 87.2% (91.7% among males and 82.9% among females). Both the overall rate and the rate for males are the highest in Africa.

There are 10 teachers' training colleges, 8 of which are in association with the University of Zimbabwe. In addition, there are 4 special training centres for teacher trainees in the Zimbabwe Integrated National Teacher Education Course. In 1990 there were 17,873 students enrolled at teachers' training colleges, 1,003 students at agricultural colleges and 20,943 students at technical colleges. There are 4 universities and 10 technical colleges.

Health. There were 1,378 government hospitals in 1993. All mission health institutions get 100% government grants-in-aid for recurrent expenditure. In 1993 there were 1,551 doctors, 194 dentists, 22,590 nurses, 411 pharmacists and 2,894 midwives. It is estimated that 1 in 5 adults are HIV infected.

Welfare. It is a statutory responsibility of the government in many areas to provide: processing and administration of war pensions and old age pensions; protection of children; administration of remand, probation and correctional institutions; registration and supervision of welfare organizations.

CULTURE

Broadcasting. Zimbabwe Broadcasting Corporation is a statutory body broadcasting a general service in English, Shona, Ndebele, Nyanja, Tonga and Kalanga. There are 3 national semi-commercial services—Radio 1, 2 and 3, in English, Shona and
